## Corridor Journey:

The Review of Reviews William Thomas Stead,1925      Employee Journey-to-work Study, Southwestern, Connecticut  
Wilbur Smith and Associates,1982      *Highway Travel Time Estimation With Data Fusion* Francesc Soriguera  
Martí,2015-11-30 This monograph presents a simple innovative approach for the measurement and short term prediction of  
highway travel times based on the fusion of inductive loop detector and toll ticket data The methodology is generic and not  
technologically captive allowing it to be easily generalized for other equivalent types of data The book shows how Bayesian  
analysis can be used to obtain fused estimates that are more reliable than the original inputs overcoming some of the  
drawbacks of travel time estimations based on unique data sources The developed methodology adds value and obtains the  
maximum in terms of travel time estimation from the available data without recurrent and costly requirements for additional  
data The application of the algorithms to empirical testing in the AP 7 toll highway in Barcelona proves that it is possible to  
develop an accurate real time travel time information system on closed toll highways with the existing surveillance  
equipment suggesting that highway operators might provide their customers with such an added value with little additional  
investment in technology      **SR-90, Junction SR-5 to Vicinity Junction SR-405, Seattle** ,1978      **Location of**
