Schumacher,1985      **Architecture's Pretexts** Aarati Kanekar,2014-11-13 The aim of this book is to expose readers to architecture's pretexts that include literary narratives film theatre painting music and ritual as a bridge between diverse intellectual territories and architecture It introduces a selection of seminal modern and contemporary architectural projects their situation within the built environment and their intellectual and formal situation context as pretexts and design paradigms Connections between diverse bodies of information will be cultivated along with the ability to posit consequential relationships for the production of architecture Architecture's Pretexts seeks to cultivate a vision for architecture that sponsors operative links between the discipline of architecture and those outside of architecture Exploring the works of various architects including Guiseppe Terragni Peter Eisenman Peter Zumthor Perry Kulper and Smout Allen and Rem Koolhaas this book provides the framework to understanding architecture through the lens of art Key concepts discussed are allegories diagrams form material montage movement musical ratios narrative sequence and representation A valuable tool with over 75 black and white illustrations for students and professionals interested in interdisciplinary methods of design thinking      **Encyclopedia of Twentieth Century Architecture** R. Stephen Sennott,2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclopedic of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century's vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries      Reading Architecture Angeliki Sioli,Yoonchun Jung,2018-04-09 Why write instead of draw when it comes to architecture Why rely on literary pieces instead of architectural treatises and writings when it comes to the study of buildings and urban environments Why rely on literary techniques and accounts instead of architectural practices and analysis when it comes to academic research and educational projects Why trust authors and writers instead of sociologists or scientists when it comes to planning for the future of cities This book builds on the existing interdisciplinary bibliography on architecture and literature but prioritizes literature's capacity to talk about the lived experience of place and the premise that literary language can often express the inexpressible It sheds light on the importance of a literary instead of a pictorial imagination for architects and it looks into four contemporary architectural subjects through a wide variety of literary works Drawing on novels that engage cities from around the world the book reveals aspects of urban space to which other means of architectural representation are blind Whether through novels that employ historical buildings or sites interpreted through specific literary methods it suggests a range of methodologies for contemporary architectural academic research By exploring the power of narrative language in conveying

the experience of lived space it discusses its potential for architectural design and pedagogy Questioning the massive architectural production of today's globalized capital driven world it turns to literature for ways to understand resist or suggest alternative paths for architectural practice Despite literature's fictional character the essays of this volume reveal true dimensions of and for places beyond their historical social and political reality dimensions of utmost importance for architects urban planners historians and theoreticians nowadays *Avery Index to Architectural Periodicals. 2d Ed., Rev. and Enl* Avery Library, 1988 *The Danteum* Thomas L. Schumacher, 1993 In 1938 Mussolini's Fascist government commissioned the team of Giuseppe Terragni and Pietro Lingeri to design the Danteum a temple to the greatest of Italian poets In this acclaimed book Thomas Shumacher traces Terragni's fanatical often mystical pursuit of the poet and explains how this unbuilt project succeeds as an architectural translation of the Divine Comedy one that mirrors the poem in structure theme and rhythm Original sketches and renderings complement Schumacher's analysis and provide a complete record of the Danteum The Danteum is a beautifully presented book that invites us to study the Danteum in its entirety The book demonstrates that architecture can transcend the realm of the physical Schumacher's Danteum brings together different moments of history into one timeless and universal whole Progressive Architecture The most penetrating study of Terragni's architecture to appear in English to date The fact that the Danteum was conceived as both a monument to the Divine Comedy and a transformation of a literary work into architectural form makes it a particularly appropriate vehicle for investigating structural parallels in different media and excellent presentation of a provocative project JSAH **Emerging Talents** Neil Spiller, 2021-09-27 There is a newfound interest in architectural education This AD is a survey of some of the best contemporary architecture student work in the world The most forward looking architecture schools worldwide are reinventing pedagogy in the hope of developing radical syllabi that are a rich mix of the virtual and the actual Design education is changing and adapting to compensate for the new material changes to the discipline and is being used to disentangle old outmoded spatial practices and replace them with new paradigms of space and representation This issue showcases the students and teachers who are pushing the envelope of architecture in extraordinary ways offering their insights into its future materiality and spatial dexterity It premieres a new young generation of architects who are likely to become names in the architectural profession and possibly important teachers themselves Their work has been selected by their own influential teachers of architecture who describe the studio methodologies and reasons for them that prompted the work Contributors Daniel K Brown Jane Burry Nat Chard Odile Decq Evan Douglass Riet Eeckhout Mark Garcia Nicolas Hannequin Perry Kulper Elena Manferdini Mark Morris Hani Rashid and Michael Young Featured institutions A Alfred Taubman College of Architecture and Urban Planning University of Michigan Architectural Association London Bartlett School of Architecture University College London Carleton University Ottawa CONFLUENCE Institute for Innovation and Creative Strategies in Architecture Paris Cooper Union New York University of Greenwich London KU Leuven Belgium
