Armageddon and Paranoia Rodric Braithwaite, 2017-09-21 A gripping account of the intense rivalry between Russia and the West from bestselling author and former diplomat Rodric Braithwaite In 1945 the atom bomb was dropped on Hiroshima Warfare was never the same again Armageddon and Paranoia relates how the power of the atom was harnessed to produce weapons capable of destroying human civilisation and what this has done to the world There are few villains in this story on both sides of the Iron Curtain dedicated scientists cracked the secrets of nature while dutiful military men planned out possible manoeuvres and politicians wrestled with intolerable decisions Patriotic citizens acquiesced to the idea that their country needed the ultimate means of defence Some protested citing the unanswerable question what end could possibly be served by such fearsome means None wanted to start a nuclear war but all were paranoid about what the other side might do The danger of annihilation by accident or design has never quite left the world As fears about who controls the nuclear codes continue to make headlines Rodric Braithwaite author of bestsellers Moscow 1941 and Afgantsy has painted a vivid and detailed portrait of this intense period in history and its terrifying implications today Watching the Bear Alan Barnes, 2025-09-01 As the Soviet threat to North America evolved in the early Cold War the world was watching What was the view from Ottawa Watching the Bear begins to tell that story Alan Barnes a twenty five year veteran of the Canadian intelligence community draws on recently declassified archival sources to offer a wholly new perspective on Canada's policies for the defence of North America from 1946 to 1964 After the Second World War Canada created an independent capacity to produce strategic intelligence assessments and Canadian analysts worked with their American counterparts to prepare joint appraisals of the looming Soviet menace Canadian and American conclusions often differed significantly but Canada's success in negotiating the ensuing tensions was instrumental in ensuring that the two countries developed a common basis for defence planning By bringing little known intelligence documentation to light Watching the Bear makes a groundbreaking contribution to the history of Canadian intelligence defence and foreign relations **The Pontecorvo Affair** Simone Turchetti, 2012-02-15 This book examines the life and motivations behind Italian born nuclear physicist and alleged spy Bruno Pontecorvo and his reasons for defecting to the Soviet Union in 1950 Inhalation Toxicology Harry Salem, Sidney A. and action Through their close look at reports involving acid rain ozone depletion and sea level rise the authors explore how experts deliberate and decide on the scientific facts about problems like climate change They also seek to understand how the scientists involved make the judgments they do how the organization and management of assessment activities affects those judgments and how expertise is identified and constructed Discerning Experts uncovers factors that can generate systematic bias and error and recommends how the process can be improved As the first study of the internal workings of large environmental assessments this book reveals their strengths and weaknesses and explains what assessments can and cannot be expected to contribute to public policy and the common good The Silverplate Bombers Richard H.
