Dartmouth Seventy Five Years In Pictures:

Dartmouth, seventy-five years in pictures E. L. Davies, 1980 Essays in Naval History, from Medieval to Modern
N.A.M. Rodger, 2023-05-31 The articles collected here two appearing for the first time in English cover a number of topics central to naval history and illustrate the author's contention that this is not only or even chiefly a distinct area of special study but rather a central theme running through the history of England and of the whole British Isles Though the subjects and the styles vary a good deal the studies are linked by a common approach and some common ideas Hence many examine ways in which naval history has formed a key element in such subjects as intellectual religious administrative or medical history and explored the nature and meaning of sea power as a theme At the same time naval history is a technical subject which demands a willingness to understand warships the most complex artefacts and the structure of large and complex organisations Detailed evidence about ships and weapons can build large conclusions for example about late Anglo Saxon government and military organisation or about the nature of warfare at sea in the Renaissance era While mostly written from the British point of view several essays explicitly survey naval developments over a range of countries and even the most narrowly focused are at least implicitly aware of the wider world of war at sea *Naval Leadership and Management, 1650-1950* Richard Harding, Helen Doe, 2012 Many works on naval history ascribe success to the special qualities of individual leaders Nelson being the prime example This book in contrast moves away from focusing on Nelson and other leading individuals to explore more fully how naval leadership worked in the context of a large complex globally capable institution It puts forward important original scholarship around four main themes the place of the hero in naval leadership organisational friction in matters of command the role of management capability in the exercise of naval power and the evolution of management and technical training in the Royal Navy Besides providing much new interesting material for naval and maritime historians the book also offers important insights for management and leadership specialists more generally

Back cover **Wisdom and War** Harry Dickinson, 2016-02-11 Opened in 1873 in buildings constructed by Charles II to house retired sailors the Royal Naval College was founded with the aim of providing officers with the highest possible scientific instruction in all branches of study bearing upon their profession For more than 125 years it taught officers ranging in rank from Sub Lieutenants to Vice Admiral providing the technical instruction that equipped a corps of naval architects to build some of the most advanced warships in the world and in later years trained the Royal Navy's nuclear engineers Despite the College's undoubted contribution towards both the education of Royal Navy personnel and technical research more broadly this is the first book to address the history of the institution from its Victorian roots to its closure in the aftermath of the Cold War Taking a chronological approach the book traces the history of the College from its establishment in 1873 a period during which technical training for a steam powered navy was increasingly vital It then shows how during the First World War academic staff at the College made a vital contribution to the development of naval weapons systems and its

medical school initiated a vaccine production programme that later produced major improvements in the public health of the nation During the Second World War damaged by enemy action that set London s docklands ablaze the College provided the first taste of naval life for more than 27 000 men and women called from civilian life to serve on shore and at sea Later chapters conclude with an exploration of the College s post war role focusing particularly on the establishment in 1959 of the Department of Nuclear Science and Technology DNST which ran a nuclear reactor on site until the College was closed in 1998 Both as a history of the Royal Naval College itself and as an exploration of the Navy s attitude toward research and education this book provides a fascinating insight into what is arguably one of Britain s most significant educational establishments

Special Trust and Confidence Cathy Downes,2013-11-26 This is an examination and an analysis of the systems of recruitment selection education and training for junior officers in the British Armed Forces It is a study based around four core institutions The Royal Military Academy Sandhurst The Britannia Royal Naval College Dartmouth the Department of Initial Officer Training Royal Air Force College Cranwell and the Officers Training Wing Commando Training Centre Royal Marines Lympstone The conclusions reveal the enduring dilemmas involved in the preparation of officer aspirants for entry to the British military profession
