Darwinism Applied The Evolutionary Path To Social Goals:

Darwinism Applied John H Beckstrom, 1993-08-23 Beckstrom explores how discoveries in evolutionary science can help people achieve but not establish social goals Beginning with the principle that human behavior is to some degree influenced by genetics the author considers how conduct can be modified in large population groupings using identified behavioral mechanisms Aid giving behavior common to human populations is established as a key factor that is fundamental to an understanding of its flip side involving abuse and neglect The universal objectives of reducing child abuse rape incest and war are explicitly addressed as are such areas as intestate property distribution street crime reduction and the fostering or discouragement of patriotism This book is a clear treatment of what practical implications neo Darwinism can have for contemporary societies

Darwinism can have for contemporary societies *Applied Evolutionary Psychology* S. Craig Roberts, 2011-11-24 Human behaviour is marvellous in its complexity variability and unpredictability Understanding it however is not solely the role of psychologists everyone has a vested interest in it from individuals to organisations and industry Recently biologists and psychologists have had considerable success incorporating insights from evolutionary theory to help them understand some fundamental psychological issues in a discipline now known as evolutionary psychology However to date these useful insights have not been widely applied to tackle specific practical problems or issues in society This innovative new book kick starts this process It provides a foundation for an incipient focus on applications of evolutionary research It draws together a collection of renowned academics from a disparate set of fields whose common interest lies in using evolutionary thinking to inform their research Topics range from reviews of evolutionary perspectives on adult and family relationships insights into business economics and marketing health and interactions with technology and the media through to major global and societal issues such as promoting green behaviour cooperation and public health and tackling crime terrorism and prejudice No other book has focused as specifically and with such broad scope on the applications of modern evolutionary psychology While the rapidly growing number of books on evolutionary psychology succeed in describing current theoretical thinking illustrated and supported by empirical studies this book uses this established basis as a backdrop and starting point for a more focused exploration of practical application This groundbreaking book will be valuable for students and researchers in

evolutionary and applied psychology as well as biology and anthropology The Caveman Mystique Martha McCaughey, 2012-09-10 Has evolution made men promiscuous skirt chasers Pop Darwinian claims about men's irrepressible heterosexuality have become increasingly common and increasingly common excuses for men's sexual aggression The Caveman Mystique traces such claims about the hairier sex through evolutionary science and popular culture After outlining the social and historical context of the rise of pop Darwinism's assertions about male sexuality and their appeal to many men Martha McCaughey shows how evolutionary discourse can get lived out as the biological truth of male sexuality Although evolutionary scientists want to use their theories to solve social problems evolutionary narratives get invoked by men looking for a Darwinian defense of bad boy behaviors McCaughey argues that evolution has nearly replaced religion as a moral guide for understanding who we are and what we must overcome to be good people Bringing together insights from the fields of science studies body studies feminist theory and queer theory The Caveman Mystique offers a fresh understanding of science science popularization and the impact of science on men's identities making a convincing case for deconstructing rather than defending the caveman **Adaptation and Human Behavior** Napoleon Chagnon, 2017-09-08 This volume presents state of the art empirical studies working in a paradigm that has become known as human behavioral ecology The emergence of this approach in anthropology was marked by publication by Aldine in 1979 of an earlier collection of studies edited by Chagnon and Irons entitled Evolutionary Biology and Human Social Behavior An Anthropological Perspective During the two decades that have passed since then this innovative approach has matured and expanded into new areas that are explored here The book opens with an introductory chapter by Chagnon and Irons tracing the origins of human behavioral ecology and its subsequent development Subsequent chapters written by both younger scholars and established researchers cover a wide range of societies and topics organized into six sections The first section includes two chapters that provide historical background on the development of human behavioral ecology and compare it to two complementary approaches in the study of evolution and human behavior evolutionary psychology and dual inheritance theory The second section includes five studies of mating efforts in a variety of societies from South America and Africa The third section covers parenting with five studies on societies from Africa Asia and North America The fourth section breaks somewhat with the tradition in human behavioral ecology by focusing on one particularly problematic issue the demographic transition using data from Europe North America and Asia The fifth section includes studies of cooperation and helping behaviors using data from societies in Micronesia and South America The sixth and final section consists of a single chapter that places the volume in a broader critical and comparative context The contributions to this volume demonstrate with a high degree of theoretical and methodological sophistication the maturity and freshness of this new paradigm in the study of human behavior The volume will be of interest to anthropologists and other professions working on the study of cross cultural human behavior **A Natural History of Rape** Randy Thornhill, Craig T. Palmer, 2001-02-23 A biologist and an anthropologist use evolutionary

biology to explain the causes and inform the prevention of rape In this controversial book Randy Thornhill and Craig Palmer use evolutionary biology to explain the causes of rape and to recommend new approaches to its prevention According to Thornhill and Palmer evolved adaptation of some sort gives rise to rape the main evolutionary question is whether rape is an adaptation itself or a by product of other adaptations Regardless of the answer Thornhill and Palmer note rape circumvents a central feature of women s reproductive strategy mate choice This is a primary reason why rape is devastating to its victims especially young women Thornhill and Palmer address and claim to demolish scientifically many myths about rape bred by social science theory over the past twenty five years The popular contention that rapists are not motivated by sexual desire is they argue scientifically inaccurate Although they argue that rape is biological Thornhill and Palmer do not view it as inevitable Their recommendations for rape prevention include teaching young males not to rape punishing rape more severely and studying the effectiveness of chemical castration They also recommend that young women consider the biological causes of rape when making decisions about dress appearance and social activities Rape could cease to exist they argue only in a society knowledgeable about its evolutionary causes The book includes a useful summary of evolutionary theory and a comparison of evolutionary biology s and social science s explanations of human behavior The authors argue for the greater explanatory power and practical usefulness of evolutionary biology The book is sure to stir up discussion both on the specific topic of rape and on the larger issues of how we understand and influence human behavior

Emotions in Command Frank K. Salter, 2017-09-08 This book is part of a quest for a general theory of organizations valid in all cultures Central to Frank Salter s investigation is the question of social power why people obey their superiors His approach is to locate the nature of organizational power in the behavioral details of hierarchical interactions in the institutional settings in which they occur

Christian Ethics Lisa Sowle Cahill, James F. Childress, 1996 This fresh analysis of the state of the question in Christian ethics charts the course for future study and exploration in the field Written in honor of James Gustafson who provides a conclusion these 22 original and tightly argued essays examine hotly debated controversies on a wide range of topics from sources of theological ethics to the moral life At the core of these complementary perspectives is the ever increasing tension between the particularly of religious and philosophical traditions and the universality of moral discourse Designed for classroom use

Forthcoming Books Rose Arny, 1997-04

Global Survival Ervin Laszlo, Peter Seidel, 2006 Our planet is undergoing extreme and shocking changes due to humankind s footprint upon it And while most involved focus on one or several specific aspects of the problem pollution groundwater depletion species diversity many are so encased in their own specialties or interests that they fail to see the greater problem

that our fragmented ways of thinking and acting are failing to resolve the environmental and related political situations threatening the viability of life on this planet We must and can do better However this will require a new way of thinking It is in light of this that the editors of this book propose a new discipline first suggested by the eminent political scientist John H Herz combining all relevant scientific disciplines with an overarching unified humanistic philosophy that will directly and positively influence the sustainability of life on Earth survival research From publisher description [Changing Their Minds](#)

Dixon,David Goodwin,Jack Wing,2003-04-30 Dixon and his colleagues provide a behaviorist perspective on governance Their concern is with the governed s responses to those who seek to govern them their governors and the counter responses that they induce from the governors They take as axiomatic that the governed are not a homogenized and amorphous them in the them us dichotomy reduced to what Carlyle called a dead logic formula thereby for the purpose of this analysis leave begging all the relevant questions The governed are not a disembodied abstraction they are an aggregate of men and women of flesh and blood In a corporation they are corporate directors whose governors are those who own or perhaps have a stake in that corporation corporate managers whose governors are the corporate directors corporate employees whose governors are the corporate managers In a society they are individuals or groups of individuals perhaps in corporations located within its jurisdiction whose governors are the members of societal political and administrative elites At the global level they are individuals or groups of individuals in countries and corporations within the jurisdiction of international governmental organizations and international regimes whose governors are those who seek to control those global governance mechanisms Whether the governed s response to their governors processs is one of compliance or antagonism and how the governors response to any antagonism has implications for governance capacity good governance and governability A provocative study that will be of interest to students and scholars of political theory international relations and management and organizational theory as well as those who are concerned with issues of governance at all levels corporate societal and global
