Desastres Elizabeth Mansilla, 1996 **Of Rainfalls and Disasters** Juan Manuel Rodríguez Esteves , Disasters associated with natural phenomena such as earth quakes floods droughts etcetera are intensifying damages that translate into deaths the loss of infrastructure and the interruption of economic activities The accelerated growth of cities frequently incorporates new areas that are susceptible to certain hazards leaving society increasingly exposed due to a mismanagement of land Since the 1990s the social sciences have developed the approach of vulnerability which considers the conditions of weakness of a society to cope with hazards We now know that risk is socially constructed and so disasters are not only a result of the intensity of the geophysical phenomena that unleash them but also of the contexts of vulnerability present when a phenomenon takes place The aim of this work is to show how the risk of flood disasters is constructed in Tijuana Baja California with four main elements as our starting point An examination of floods since the late 19th century the voice of the actors present for flooding events a theoretical model to understand the relationship between the hazard and the magnitude of the risk and recommendations for disaster risk management at a local level **Disasters and Neoliberalism** Gabriela Vera-Cortés, Jesús Manuel Macías-Medrano, 2020-09-24 This book shows how the adoption of the neoliberal development model has increased the social vulnerability to disasters with a special focus on Mexico a country which once was the role model of the neoliberal turn in Latin America It brings together 12 case studies of disasters such as floods earthquakes and volcanic emergencies in both urban and rural areas to show how neoliberal development projects and changes in legislation affected disaster prevention and management in different parts of the country The case studies from Mexico are complemented by two comparative studies which analyze the impacts of neoliberalism in disaster prevention and management in Mexico Brazil United States and Italy **Disasters and Neoliberalism Different Expressions of Social Vulnerability** presents a unique contribution to the interdisciplinary field of disaster research by presenting qualitative studies of disaster vulnerability from the perspective of scholars from the Global South bringing a fresh and critical approach to English speaking social sciences qualitative researchers working on disaster risks in a number of fields such as geography anthropology sociology political science and environmental studies **The Anthropology of Disasters in Latin America** Virginia García-Acosta, 2019-12-09 This book offers anthropological insights into disasters in Latin America It fills a gap in the literature by bringing together national and regional perspectives in the study of disasters The book essentially explores the emergence and development of anthropological studies of disasters It adopts a methodological approach based on ethnography participant observation and field research to assess the social and historical constructions of disasters and how these are perceived by people of a certain region This regional perspective helps assess long term dynamics regional capacities and regional global interactions on disaster sites With chapters written by prominent Latin American anthropologists this book also considers the role of the state and other nongovernmental organizations in managing disasters

and the specific conditions of each country relative to a greater or lesser incidence of disastrous events Globalizing the existing literature on disasters with a focus on Latin America this book offers multidisciplinary insights that will be of interest to academics and students of geography anthropology sociology and political science World Social Science Report 2013 UNESCO,ISSC,2013-11-15 Produced by the International Social Science Council ISSC and UNESCO and published by the OECD the 2013 World Social Science Report represents a comprehensive overview of the field gathering the thoughts and expertise of hundreds of social scientists from around the world This edition focuses on the transformative role of the social sciences in confronting climate and broader processes of environmental change and in addressing priority problems from energy and water biodiversity and land use to urbanisation migration and education The report includes 100 articles written by 150 authors from 41 countries all over the world Authors represent some 24 disciplines mainly in the social sciences The contributions highlight the central importance of social science knowledge for environmental change research as a means of understanding changing environments in terms of social processes and as framework for finding concrete solutions towards sustainability **World Social Science Report 2013 Changing Global Environments** International Social Science Council,United Nations Educational, Scientific and Cultural Organization,2013-11-15 This book represents a comprehensive overview of the field gathering the thoughts and expertise of hundreds of social scientists from around the world This edition focuses on the transformative role of the social sciences in confronting climate and broader processes of environmental change El miedo en el Perú Claudia Rosas Lauro,2005 *Coping with Global Environmental Change, Disasters and Security* Hans Günter Brauch,Ürsula Oswald Spring,Czeslaw Mesjasz,John Grin,Patricia Kameri-Mbote,Béchir Chourou,Pál Dunay,Joern Birkmann,2011-02-03 *Coping with Global Environmental Change Disasters and Security Threats Challenges Vulnerabilities and Risks* reviews conceptual debates and case studies focusing on disasters and security threats challenges vulnerabilities and risks in Europe the Mediterranean and other regions It discusses social science concepts of vulnerability and risks global regional and national security challenges global warming floods desertification and drought as environmental security challenges water and food security challenges and vulnerabilities vulnerability mapping of environmental security challenges and risks contributions of remote sensing to the recognition of security risks mainstreaming early warning of conflicts and hazards and provides conceptual and policy conclusions Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation Christopher B. Field,Vicente Barros,Thomas F. Stocker,Qin Dahe,2012-05-28 This Intergovernmental Panel on Climate Change Special Report IPCC SREX explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation Extreme weather and climate events interacting with exposed and vulnerable human and natural systems can lead to disasters Changes in the frequency and severity of the physical events affect disaster risk but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability Some types of extreme weather and climate events have increased

in frequency or magnitude but populations and assets at risk have also increased with consequences for disaster risk Opportunities for managing risks of weather and climate related disasters exist or can be developed at any scale local to international Prepared following strict IPCC procedures SREX is an invaluable assessment for anyone interested in climate extremes environmental disasters and adaptation to climate change including policymakers the private sector and academic researchers
