Descartes Error:

Descartes' Error Antonio Damasio, 2005-09-27 An ambitious and meticulous foray into the nature of being The Boston Globe A landmark exploration of the relationship between emotion and reason Since Descartes famously proclaimed I think therefore I am science has often overlooked emotions as the source of a person's true being Even modern neuroscience has tended until recently to concentrate on the cognitive aspects of brain function disregarding emotions This attitude began to change with the publication of Descartes Error in 1995 Antonio Damasio one of the world's leading neurologists The New York Times challenged traditional ideas about the connection between emotions and rationality In this wondrously engaging book Damasio takes the reader on a journey of scientific discovery through a series of case studies demonstrating what many of us have long suspected emotions are not a luxury they are essential to rational thinking and to normal social behavior

Descartes' Error Antonio R. Damasio, 2006 A great scientist presents a radical new conception of how our minds work arguing that rational decisions are not the product of logic alone but require the support of emotion and feeling

Exploring Antonio Damasio's Descartes' Error □□·□□, 2009 **The Mechanics of Passions** Alain Ehrenberg, 2020-09-23 Cognitive neuroscience once a specialized area of psychology and biology has enjoyed increased worldwide legitimacy in the last thirty years not only in psychiatry and mental health but also in fields as diverse as education economics marketing and law How can this surge in popularity be explained Has the new science of human behaviour now become the barometer of our conduct and our lives taking the place previously occupied by psychoanalysis Rather than asking if neuronal man will replace social man or how to surmount the opposition between the biological and the social The Mechanics of Passions uncovers hidden relationships between global social ideals and specialized concepts of neuroscience and cognitive science Proposing a historical sociology situated in the dual contexts of the history of sciences and the history of self representation Alain Ehrenberg describes the conditions through which cognitive neuroscience has developed and acquired a strong moral authority in our individualistic society permeated by ideas values and norms of autonomy Cognitive neuroscience offers the promise of turning personal limitations into assets by exploring an individual's hidden potential The Mechanics of Passions identifies this as the echo of social ideals of autonomy affirming that the moral authority of cognitive neuroscience stems as much from cultural norms as from any results of scientific or medical experimentation **How to Play Philosophy** Michael Picard, 2022-02-14 Philosophy can transform your life But the only philosophy that can save you is your own Yet how do you find your own in an age of misinformation and unbridled spin when truth is unfashionable and hype hyper attractive Where is the air needed to breathe the honest spirit of inquiry How to Play Philosophy is a breezy array of lyrical creative essays that explore timeless and timely ideas about who we are how we live and what we think MIT trained philosopher Michael Picard gives airing to numerous philosophers from conflicting traditions and builds an intellectual background to enable readers to draw their own conclusions Written in a spirit of free and playful inquiry the essays were composed originally to support

public participatory philosophy or Caf Philosophy which the author has facilitated for decades Subjects include Play it With Feeling Desire Stress Anger Games We Play Intimacy Loyalty Betrayal and Playing Fair Values Good Integrity alongside epistemological topics including Truth Knowledge Certainty Objectivity and the perennial metaphysical quandaries Human Nature The Sacred God Written for everyone interested in exploring age old subjects in an age of disposable content How to Play Philosophy offers playful provocations with the aim of enabling independent thinking and deeper public conversations

Radical Embodiment David H. Nikkel, 2010-01-01 Radical embodiment refers to an anthropology and an epistemology fundamentally rooted in our bodies as always in correlation with our natural and social worlds All human rationality meaning and value arise not only instrumentally but also substantively from this embodiment in the world Radical embodiment reacts against Enlightenment mind body dualism as well as its monistic offshoots including the physicalism that reduces everything to component matter energy at the expense of subjectivity and meaning It also rejects against certain forms of postmodernism that reinscribe modern dualisms David H Nikkel develops the perspective of radical embodiment by examining varieties of modern and postmodern theology and the nature and role of tradition in terms of linguistic and non linguistic experience the religion and science dialogue on the nature of consciousness and the immanent and transcendent aspects of God

Law as Civic Education Ariel Liberman, 2025-06-27 If a civic education is the essential foundation for a functioning discursive democracy how should it be taught This book offers an innovative solution arguing that far from abandoning the often grand promise of civic education as a means of cultivating reasoning skills and democratic character we should embrace it and proposes a reimagined civic education based on teaching students in primary and secondary school law and legal reasoning Drawing on a range of theoretical disciplines law philosophy ethics sociology psychology and moral educational and child development theory this monograph justifies the benefits of law learning as a form of character and civic education and offers historical and comparative educational examples to show what is possible It demonstrates how legal teaching can be incorporated into a K 12 curriculum and argues that such training can be transformative guiding students to become citizens capable of meeting the demands of democracy citizens with stronger reasoning skills a motivation to self examine their values and beliefs and bring them into conversation with social values and an ability to effectively navigate political institutions and participate in public discourse This compelling and deeply original work will be of interest to scholars and educators in the fields of civic education character and virtue education legal studies and philosophy of education
