A Selected Bibliography. (Reprinted from Descartes: Philosophical Writings.). Raymond Klibansky, 1970 **Time, Technology and Environment** Marco Altamirano, 2016-02-04 Marco Altamirano critiques the modern concept of nature to chart a new trajectory for the philosophy of nature He reveals the modern origins of the epistemological configuration of nature where a subject confronts an object in space and at time t and wonders about her

mode of access to that object After critiquing the spatial orientation of this concept of nature Altamirano shows that a new concept of time is necessary to reinstall the subject within its concrete ecology Altamirano goes on to deploy conceptual resources excavated from Deleuze Guattari Foucault and Leroi Gourhan to show how technology which bypasses the nature/artifice distinction is an essential dimension of the philosophy of nature Ultimately this book draws the profile of a concept of nature based on time and technology that escapes the nature/artifice distinction that has mired the philosophy of nature for so long
