Descartes Selection:

Descartes: Meditations on First Philosophy René Descartes, 2017-02-16 This is an updated edition of John Cottingham's acclaimed translation of Descartes's philosophical masterpiece including an abridgement of Descartes's Objections and Replies **The Meditations, and Selection from the Principles, of René Descartes (1596-1650)** René Descartes, Lucien Lévy-Bruhl, 1909 The Method, Meditations, and Selections from the Principles of Descartes René Descartes, 1879 *Selections from the Literature of Theism* Alfred Caldecott, Hugh Ross Mackintosh, 1904 *Meditations on First Philosophy* René Descartes, 2008-05-08 It is some years now since I realized how many false opinions I had accepted as true from childhood onwards I saw that at some stage in my life the whole structure would have to be utterly demolished In Descartes's Meditations one of the key texts of Western philosophy the thinker rejects all his former beliefs in the quest for new certainties Discovering his own existence as a thinking entity in the very exercise of doubt he goes on to prove the existence of God who guarantees his clear and distinct ideas as a means of access to the truth He develops new conceptions of body and mind capable of serving as foundations for the new science of nature Subsequent philosophy has grappled with Descartes's legacy questioning many of its conclusions and even his basic approach but his arguments set the agenda for many of the greatest philosophical thinkers and their fascination endures This new translation includes the Third and Fourth Objections and Replies in full and a selection from the rest of these exchanges with Descartes's contemporaries that helped to expound his philosophy ABOUT THE SERIES For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe Each affordable volume reflects Oxford's commitment to scholarship providing the most accurate text plus a wealth of other valuable features including expert introductions by leading authorities helpful notes to clarify the text up to date bibliographies for further study and much more Descartes: Selected Philosophical Writings René Descartes, 1988-09-08 Based on the new and much acclaimed two volume Cambridge edition of The Philosophical Writings of Descartes by Cottingham Stoothoff and Murdoch this anthology of essential texts contains the most important and widely studied of those writings including the Discourse and Meditations and substantial extracts from the Regulae Optics Principles Objections and Replies Comments on a Broadsheet and Passions of the Soul *Philosophical Writings, by Rene Descartes (pbk)*. Kowalski, 2015-08-24 Featuring significant revisions and updates. *Classic Questions and Contemporary Film: An Introduction to Philosophy* 2nd Edition uses popular movies as a highly accessible framework for introducing key philosophical concepts. Explores 28 films with 18 new to this edition including *Eternal Sunshine of the Spotless Mind*, *Hotel Rwanda*, *V for Vendetta*, and *Memento*. Discusses numerous philosophical issues not covered in the first edition, including a new chapter covering issues of personal identity, the meaningfulness of life and death, and existentialism. Offers a rich pedagogical framework comprised of key classic readings, chapter learning outcomes, jargon-free argument analysis, critical thinking, and trivia questions, a glossary of terms, and textboxes with notes on the movies discussed. Revised to be even more accessible to beginning philosophers. *Descartes* René Descartes, 2004 Each volume in this series has a full Introduction including biographical details and a further reading list. **Selections from the Literature of Theism** Alfred Caldecott, Hugh Ross Mackintosh, 1931 **Rene Descartes: Meditations on First Philosophy**, 1986-10-09 Of all Descartes' works, students are most often referred to his *Meditations* as a key text in Western philosophy. This textbook extracts from the recently published two-volume *Philosophical Writings of Descartes* translated by Cottingham, Stoothoff, and Murdoch, the authoritative new translation of the *Meditations*, and complements it with a thematic abridgement of the *Objections and Replies*. The selection of extracts from the *Objections and Replies* has been done specially for the present volume with the aim of assisting the student to come to terms with the subtle reasoning of the *Meditations* by focusing on some of the principal philosophical difficulties raised by the work. Material is arranged thematically so as to indicate the main points of criticism which occurred to Descartes' contemporaries as they read the *Meditations*, and how Descartes clarified his arguments in response to those criticisms. The new translation of these fundamental writings is based on the best available Latin or French texts and rendered into clear, readable English. *Reforming the Art of Living* Rico Vitz, 2014-10-20 Descartes' concern with the proper method of belief formation is evident in the titles of his works, e.g., *The Search after Truth*.

The Rules for the Direction of the Mind and The Discourse on Method of rightly conducting one's reason and seeking the truth in the sciences. It is most apparent however in his famous discussions both in the Meditations and in the Principles of one particularly noteworthy source of our doxastic errors namely the misuse of one's will. What is not widely recognized let alone appreciated and understood is the relationship between his concern with belief formation and his concern with virtue. In fact few seem to realize that Descartes regards doxastic errors as moral errors and as sins both because such errors are intrinsically vicious and because they entail notably deleterious social consequences. Reforming the Art of Living seeks to rectify this rather common oversight in two ways. First it aims to elucidate the nature of Descartes's account of virtuous belief formation. Second it aims both i) to illuminate the social significance of Descartes's philosophical program as it relates to the understanding and practice not of science but of religion and ii) to develop a kind of Leibnizian critique of this aspect of his program. More specifically it aims to show that Descartes's project is dangerous insofar as it is subversive not only of traditional Christianity but also of other traditional forms of religion both in theory and in practice.
