### **Questions and Information**

**Systems** Thomas W. Lauer,Eileen Peacock,Arthur C. Graesser,2013-04-15 The design and functioning of an information system improve to the extent that the system can handle the questions people ask Surprisingly however researchers in the cognitive computer and information sciences have not thoroughly examined the multitude of relationships between information systems and questions both question asking and answering The purpose of this book is to explicitly examine these relationships Chapter contributors believe that questions play a central role in the analysis design and use of different kinds of natural or artificial information systems such as human cognition social interaction communication networks and intelligent tutoring systems Their efforts show that data structures and representations need to be organized around the questioning mechanisms in order to achieve a quick retrieval of relevant useful information

### **Virtual Taste and Smell**

**Technologies for Multisensory Internet and Virtual Reality** Adrian David Cheok,Kasun Karunanayaka,2018-06-29 Currently Internet and virtual reality communication is essentially audio visual The next important breakthrough of the Internet will be the communication and sharing of smell and taste experiences digitally Audio visual stimuli are frequency based and they can be easily digitized and actuated On the other hand taste and smell stimuli are based on chemical

molecules therefore they are not easy to digitize or actuate To solve this problem we are required to discover new digital actuation technologies for taste and smell The authors of this book have experimented on developing digital actuation devices for several years This book will provide a complete overview of the importance of digitizing taste and smell prior works proposed technologies by the authors other state of the art research advantages and limitations of the proposed methods and future applications We expect digital taste and smell technologies will revolutionize the field of multisensory augmented reality and open up new interaction possibilities in different disciplines such as Human Computer Interaction Communication and Augmented and Virtual Reality
