Design For A Livable Planet

Michael John Bradshaw

Design For A Livable Planet:

Design for a Livable Planet Jon Naar, 1990 This book explains in straightforward language the causes and effects of environmental pollution AND offers SOLUTIONS practical steps you can take to begin cleaning up and prevent further damage

Design for a Living Planet Michael Mehaffy and Nikos A. Salingaros, 2017-05-30 In this brief accessible volume the authors an urban philosopher and a mathematician physicist explain the surprising new findings from the sciences that are beginning to transform environmental design in the modern era Authors Michael Mehaffy and Nikos Salingaros explore fractals networks self organization dynamical systems and other revolutionary ideas describing them to non science readers in a direct and engaging way The book also examines fascinating new topics of design including Agile Wiki Design Patterns and other open source approaches from the software world The authors conclude that a profound transformation is under way in modern design and today's students and practitioners will need to be aware of its implications for our future Lucidly describes what's coming in the world of design and what needs to come Ward Cunningham Inventor of wiki and pioneer of Pattern Languages of Programming Agile and Scrum Essential reading for all urban designers Jeff Speck Author of Walkable City Brilliant Charles Montgomery Author of Happy City Inspired compelling and fascinating Recognizes that a true architecture can be dug from the facts insights and theories that occur with a broadening of science to include the human being Christopher Alexander Author of A Pattern Language and Notes on the Synthesis of Form Some comments on the individual chapters Packed with detail and beautiful in presentation Gil Friend Human society must find a path of retreat Salingaros and Mehaffy point the way David Brussat Providence Journal Michael Mehaffy and Nikos Salingaros have written some brilliant articles on how we can co create cities which are truly resilient rather than being engineered resilient Smallworld Urbanism For me this essay was like a flash of insight and I suddenly saw the world in a new light Oeyvind Holmstad Permaliv We've just come across a very thoughtful article by Michael Mehaffy and Nikos Salingaros who draw a number of lessons from biological systems and use them to draw conclusions about how resilient human systems must be designed Resilient Design Institute Salingaros and Mehaffy take us from the configuration of city spaces to the order of cells in living beings Jaap Dawson Delft Institute of Technology If you wanted to know where the cutting edge was in urban design it is here Patrick J Kennedy CarFreeInBigD This is the single most intelligent and illuminating article I've seen on Archdaily in 3 years N ming P ngl n Zh China Michael Mehaffy is an urbanist and design theorist and a periodic visiting professor or adjunct in five graduate universities in four countries and three disciplines architecture urban planning and philosophy including the University of Oregon US and the University of Strathclyde UK He has been a close associate of the architect and software pioneer Christopher Alexander and a Research Associate with the Center for Environmental Structure Alexander's research center founded in 1967 He is currently executive director of Portland Oregon based Sustasis Foundation and editor of Sustasis Press Nikos A Salingaros is a mathematician and polymath known for his work on urban

theory architectural theory complexity theory and design philosophy He has been a close collaborator of the architect and computer software pioneer Christopher Alexander Salingaros published substantive research on Algebras Mathematical Physics Electromagnetic Fields and Thermonuclear Fusion before turning his attention to Architecture and Urbanism He is Professor of Mathematics at the University of Texas at San Antonio and has been on the Architecture faculties of universities in Italy Mexico and The Netherlands
