This book explores how textile design bridges the decorative and the functional and takes us from handcrafting to industrial manufacture. In doing so it distinguishes textiles as a distinctive design discipline against the backdrop of today's emerging design issues. With commentaries from a range of international design scholars, the book demonstrates how design theory is now being employed in diverse scenarios to encourage innovation beyond the field of design itself. Positioning textiles within contemporary design research, *Textile Design Theory in the Making* reveals how the theory and practice of textile design exist in a synergistic creative relationship. Drawing on qualitative research methods including auto ethnography and feminist critique, the book provides a theoretical underpinning for textile designers working in interdisciplinary scenarios, uniting theory and texts from the fields of anthropology, philosophy, literature and material design. *Mastering the Art of Fabric Printing and Design* Laurie Wisburn, 2012-02-08 This authoritative guide outlines everything readers need to know to create gorgeous fabrics.
