Designer Children Reconciling Genetic Technology Feminism And Christian Faith:

Designer Children Karen Peterson-Iyer, 2004 Amazingly for the first time in human history couples interested in becoming parents may soon be able to directly pre select or alter specific genetic characteristics of their offspring However this new capacity and its potential to be used for good or evil are of increasing and pressing moral concern In *Designer Children* Peterson Iyer hopes to construct some moral ground under society's feet regarding genetic technology She draws upon the best insights from Christian faith and from feminist thought in order to evaluate the various ways in which to genetically shape children With great clarity and care she employs the concept of human flourishing as a vision and guide as we wade through the quagmire of ethical questions to advance specific recommendations about three contemporary types of genetic manipulation gene therapy to prevent cystic fibrosis genetic enhancement of memory and sex pre selection *God, Science, and Designer Genes* Spencer S. Stober, Donna Yarri, 2009-10-13 A biologist and a Christian theologian examine the scientific and philosophical implications and potential impacts of genetic technologies *God Science and Designer Genes An Exploration of Emerging Technologies* provides a unique approach to the central ethical dilemma in contemporary science offering both an up to date account of the current state of genetic technologies and insightful discussions of the moral theological questions these technologies raise Coauthored by professors of biology and theology *God Science and Designer Genes* examines a range of from the headlines issues including the relationship between science and religion designing our children stem cell research cloning genetics and behavior genetics and privacy and using genetic technologies for social justice Who should benefit personally and financially from DNA technology Who might be harmed How do we protect individual rights and guard against discrimination How will embryo modification affect the identity of those so modified *God Science and Designer Genes* gives readers an eloquent thoughtful and objective foundation for considering these and other questions about the potential conflict between scientific achievement personal faith and social responsibility **The Oxford Handbook of Religious Perspectives on Reproductive Ethics** Davis, 2023 As I write this introduction the third season of the Israeli series *Shtisel* has arrived on Netflix eagerly awaited by viewers around the world who would never have imagined how caught up they would get by this family drama of four generations of ultra Orthodox Jews living in Jerusalem One episode focuses on Ruchami and Hanina a young couple who have been married for five years but without children It turns out that pregnancy and childbirth would threaten Ruchami's life She is using an IUD but she keeps threatening to have it removed risking her life to become a mother Finally with great reluctance Hanina visits the rebbe the spiritual authority in their community to discuss the possibility of using a surrogate They are says the rebbe caught between two non ideal situations surrogacy normally forbidden is non ideal but so is Ruchami's unhappiness and the possibility that she might go ahead and take the risk which is also forbidden *Law's Virtues* Cathleen Kaveny, 2012-09-20 Can the law promote moral values even in pluralistic societies such as the United States Drawing upon important federal legislation such as the

Americans with Disabilities Act legal scholar and moral theologian Cathleen Kaveny argues that it can. In conversation with thinkers as diverse as Thomas Aquinas, Pope John Paul II and Joseph Raz she argues that the law rightly promotes the values of autonomy and solidarity. At the same time she cautions that wise lawmakers will not enact mandates that are too far out of step with the lived moral values of the actual community. According to Kaveny the law is best understood as a moral teacher encouraging people to act virtuously rather than a police officer requiring them to do so. In *Law's Virtues* Kaveny expertly applies this theoretical framework to the controversial moral legal issues of abortion, genetics and euthanasia. In addition she proposes a moral analysis of the act of voting in dialogue with the election guides issued by the US bishops. Moving beyond the culture wars this bold and provocative volume proposes a vision of the relationship of law and morality that is realistic without being relativistic and optimistic without being utopian.

Altering Nature B. A. Lustig, B.A. Brody, Gerald P. McKenny, 2008-11-01 B. Andrew Lustig, Baruch A. Brody and Gerald P. McKenny. In this second volume of the *Altering Nature* project we situate specific religious and policy discussions of four broad areas of biotechnology within the context of our interdisciplinary research on concepts of nature and the natural. In the first volume *Altering Nature: Concepts of Nature and the Natural in Biotechnology Debates* we invited five groups of scholars to explore the diverse conceptions of nature and the natural that shape moral judgments about human alterations of nature as especially exemplified by recent developments in biotechnology. A careful reading of such developments reveals that assessments of them whether positive or negative are often informed by different conceptual interpretations of nature and the natural with differing implications for judgments about the appropriateness of particular alterations of nature. These varying interpretations of nature and the natural often result from the distinctive perspectives that characterize various scholarly disciplines. Therefore in an effort to explore the variety of meanings that attend discussions of the concepts of nature and the natural the contributors to the first volume of *Altering Nature* addressed those concepts from five different disciplinary vantages. A first group of scholars analyzed a range of religious and spiritual perspectives on concepts of nature and the natural. Their research highlighted the thematic historical and methodological touchstones in those traditions that shape their perspectives on nature.

Cultural Landscapes Gabriel R. Ricci, 2018-02-06. Dualism between man and nature has been a persistent feature of Western thought and spirituality from ancient times to the present. The opposition of mind and body, consciousness and world has tended to obscure the ways in which humans are ecologically part of interconnected systems, some of which are obvious while others operate in hidden but life sustaining ways. *Cultural Landscapes* explores the physical ways in which we are intimately linked to the land and the intellectual and aesthetic connections human consciousness has with the landscape. Following the editor's introductory essay the lead article by Jame Schaeffer, *Quest for the Common Good: A Collaborative Public Theology for a Life Sustaining Climate* assesses the lightning rod issue of global warming in the context of a public and ecumenical theology and sets the tone for this normative assessment of our relationship with nature. Likewise David Kenley's essay *Three*

Gorges be Dammed The Philosophical Roots of Environmentalism in China reveals the traditional philosophical and cultural values that can sustain a vital environmentalism in the East David Brown s historical insights into the use of the American landscape to define historical writing complement Patricia Likos Ricci s historical treatment of nineteenth century landscape painting and the first call to preserve wilderness in the United States Matt Willen An Feochszn and David Martinez What Worlds are Made of The Lakota Sense of Place both demonstrate how space is transformed into place through song and mythic tales On a metaphysical note Andreas Philippopoulos Mihalopolos essay On the Line of the Horizon Anxiety in de Chirico s Metaphysical Spaces provides the reader with psychological and existential insights into the disorienting paintings of de Chirico and Gabriel Ricci s concluding essay tours the landscape that underpins Heidegger s ontological speculations The contributions to this volume are posited on the belief that culture society and human history are ultimately rooted in the natural world This integration may explain why humanity has always looked to nature for moral and ethical guidelines Gabriel R Ricci is associate professor of humanities and the chair of the Department of History at Elizabethtown College in Pennsylvania He is the author of Time Consciousness The Philosophical Uses of History published by Transaction
