Designing with the Mind in Mind Jeff Johnson, 2010-05-20 Early user interface UI practitioners were trained in cognitive psychology from which UI design rules were based But as the field evolves designers enter the field from many disciplines Practitioners today have enough experience in UI design that they have been exposed to design rules but it is essential that they understand the psychology behind the rules in order to effectively apply them In *Designing with the Mind in Mind* Jeff Johnson author of the best selling *GUI Bloopers* provides designers with just enough background in perceptual and cognitive psychology that UI design guidelines make intuitive sense rather than being just a list of rules to follow The first practical all in one source for practitioners on user interface design rules and why when and how to apply them Provides just enough background into the reasoning behind interface design rules that practitioners can make informed decisions in every project Gives practitioners the insight they need to make educated design decisions when confronted with tradeoffs including competing design rules time constrictions or limited resources

User Interface Design Larry E. Wood, 2018-05-04 Although numerous sources document aspects of user centered design there are few references that consider how a designer transforms the information gathered about users and their work into an effective user interface design This book explains just how designers bridge that gap A group of leading experts in GUI design describe their methods in the context of specific design projects and while the projects processes and methods vary considerably the common theme is building a bridge between user requirements and user interface design
