Desiring Practices Architecture Gender And The Interdisciplinary:

Desiring Practices Duncan McCordquodale, Katerina Rüedi, Sarah Wigglesworth, 1995 *Architecture & Feminist Critical Theory* Hilde Heynen, 2025-11-26 Hilde Heynen is a Belgian architectural theorist whose work bridges neo Marxist critical theory and current feminist discourse applying these perspectives to architectural culture This volume collects her most significant texts from three decades of intellectual work centred on three feature concepts mimesis dwelling and displacement It offers readers incisive reflections on architects roles in shaping societies and the alliance between ideology societal structures of injustice political economy housing and the built environment Within a fierce post critical debate among scholars who have begun to question the relevance of architectural theory to the discipline in the early twenty first century Heynen s position remains constant throughout her writings in defence of architectural theory as a social and transformative practice This collection is essential reading for new generations of architects and cultural theorists interested in modernity gender and criticality

Gender Studies in Architecture Dörte Kuhlmann, 2014-04-11 Analyzing a range of ideas from biological evolutionary and anthropological theories to a variety of feminist psychoanalytic poststructuralist and constructivist discourses this book provides a comprehensive introduction to the problematics of gender and power in architectural and urban design Topics range from conceptions of postulated matriarchal architecture in Old Europe to contemporary technologies of control from the mechanisms of gaze to architectural performatives from the under representation of women in the planning profession to the integration of gender issues to the curriculum The particular strengths of the book lie in its inclusiveness and critical analysis It is not a partisan defence of feminism or any other theory but a critical introduction to the issues relating to gender Moreover the conclusions reach beyond a narrow gender studies perspective to social and ethical considerations that are unavoidable in any responsible architectural or urbanistic practice With its broad range and balanced analysis of different theories the book is suitable as an overview of gender studies in architecture and useful for any designer who is concerned with the social effects of the built environment

Women, Practice, Architecture Naomi Stead, 2016-01-08 The image of the architect is undeniably gendered While the male architect might be celebrated as the ideal man in Hollywood romantic comedies blessed with practicality and creativity in equal measure to impeccable taste and an enviable lifestyle the image of the woman architect is not so clear cut While women have been practicing and excelling in architecture for more than a hundred years their professional identity as constructed in the media is complex and sometimes contradictory This book explores the working lives and aspirations of women in architectural practice but more than this it explores how popular media newspapers magazines and websites serve to define and describe who a woman architect should be what she should look like and how she should behave Looking further into the way that professional characteristics are reinforced through awards like the Pritzker Prize the book demonstrates how idealised characteristics such as sensitivity and vision are seen to be neither entirely masculine nor feminine but instead a

complex hybrid owing much to historic concepts of genius Drawing on history sociology media analysis and feminist theories of architectural practice the book will be of interest to all of those who seek to better understand the image and identity of the architect This book was published as a double special issue of Architectural Theory Review **The Contested Territory of Architectural Theory** Elie G. Haddad, 2022-10-21 This book brings together a diverse group of theoreticians to explore architectural theory as a discipline assessing its condition and relevance to contemporary practice Offering critical assessment in the face of major social and environmental issues of today 17 original contributions address the relevance of architectural theory in the contemporary world from various perspectives including but not limited to politics gender representation race environmental crisis and history The chapters are grouped into two distinct sections the first section explores various historical perspectives on architectural theory mapping theory's historiographical turn and its emergence and decline from the 1960s to the present the second offers alternative visions and new directions for architectural theory incorporating feminist and human rights perspectives and addressing contemporary issues such as Artificial Intelligence and the Age of Acceleration This edited collection features contributions from renowned scholars as well as emergent voices with a Foreword by David Leatherbarrow This book will be of great interest to graduate and upper level students of architecture as well as academics and practicing architects *Symbolic Houses in Judaism* Mimi Levy Lipis, 2017-05-15 Investigating Jewish spatial practices by exploring the symbol of the house in Judaism this book examines two groups of houses ritual objects based on the iconology of the house ritual houses and house metaphors the text community and the covenant with god as house This unique pairing is explored as place making tools which exist in a constant state of tension between diaspora and belonging Containing many photographs of historical and contemporary artefacts from Europe Israel and the United States this book maps out the intersection of architecture Jewish studies cultural and gender studies and opens up the discussion of distinctly Jewish objects and metaphors to discourses taking place outside explicitly Jewish contexts

Intersections Iain Borden, Jane Rendell, 2000 Intersections represents a newly emergent approach to the history of architecture that addresses both the relevance of critical theories to an historical understanding of architecture and the development of those theories *Women's Creativity since the Modern Movement (1918-2018)* Helena Seražin, Emilia Maria Garda, Caterina Franchini, 2018-06-13 Extensive work is a result of four year research within the international project Women's Creativity since the Modern Movement and brings new insights into women in architecture construction design urban planning and landscape architecture in Europe and in the rest of the world It is divided into eight chapters that combine 116 articles on topics A Women's education and training National and international mappings B Women's legacy and heritage Protection restoration and enhancement C Women in communication and professional networks D Women and cultural tourism E Women's achievements and professional attainments Moving boundaries F Women and sustainability City and Landscape G Women as subjects Documentation methodology interpretation and enhancement SG Design drawings Obse no
