Descartes Belief Skepticism And Virtue:

Descartes Richard Davies,2002-09-26 An original reassessment of Descartes work which reinserts it in its contemporary context Explores the notion of intellectual virtue in Descartes inquiry and argues for a new approach to Descartes ideas of scepticism and the sciences

Reforming the Art of Living Rico Vitz,2014-10-20 Descartes s concern with the proper method of belief formation is evident in the titles of his works e g The Search after Truth The Rules for the Direction of the Mind and The Discourse on Method of rightly conducting one s reason and seeking the truth in the sciences It is most apparent however in his famous discussions both in the Meditations and in the Principles of one particularly noteworthy source of our doxastic errors namely the misuse of one s will What is not widely recognized let alone appreciated and understood is the relationship between his concern with belief formation and his concern with virtue In fact few seem to realize that Descartes regards doxastic errors as moral errors and as sins both because such errors are intrinsically vicious and because they entail notably deleterious social consequences Reforming the Art of Living seeks to rectify this rather common oversight in two ways First it aims to elucidate the nature of Descartes s account of virtuous belief formation Second it aims both i to illuminate the social significance of Descartes s philosophical program as it relates to the understanding and practice not of science but of religion and ii to develop a kind of Leibnizian critique of this aspect of his program More specifically it aims to show that Descartes s project is dangerous insofar as it is subversive not only of traditional Christianity but also of other traditional forms of religion both in theory and in practice

Virtuous Thoughts: The Philosophy of Ernest Sosa John Turri,2013-03-14 This collection is a major contribution to the understanding and evaluation of Ernest Sosa s profound and wide ranging philosophy in epistemology and beyond A balanced fair and critical volume it offers a sensitive appreciation of his wide philosophical purview a nuanced assessment of the detail of his thought and a spur to exploring the linkages between the varied topics explored by the subtle mind of this great American scholar The papers explore a wealth of Sosa s academic interests including his work on philosophical method the philosophy of mind and language metaphysics and value theory in addition to his output on epistemology itself It offers for example a rebuttal of the counterarguments to Sosa s reliabilist theory of introspective justification which itself concludes with some objections to Sosa s stated views on the speckled hen problem Other authors track the connections of his virtue theory to his advocacy of bi level epistemology provide reflections on Sosa s views on the epistemological tradition and examine the nexus of his beliefs on intuition and philosophical methodology This volume is an insightful reckoning of Sosa s academic account

Jane Austen's Philosophy of the Virtues S. Emsley,2005-10-13 This book examines Austen s novels in relation to her philosophical and religious context demonstrating that the combination of the classical and theological traditions of the virtues is central to her work Austen s heroines learn to confront the fundamental ethical question of how to live their lives Instead of defining virtue only in the narrow sense of female sexual virtue Austen opens up questions about a plurality of virtues In fresh readings of the six

completed novels plus Lady Susan Emsley shows how Austen's complex imaginative representations of the tensions among the virtues engage with and expand on classical and Christian ethical thought

Columbia Companion to Twentieth-Century Philosophies Constantin V. Boundas, 2007 Columbia Companion to Twentieth Century Philosophies is the first guide to cover both the Anglo American analytic and European continental traditions Organized thematically the volume thoroughly discusses the major movements and fields of each tradition and features the contributions of highly distinguished specialists in their fields This book is divided into three sections The first is devoted to highlighting the multidimensional work of philosophers identified with the analytic tradition with Nicholas Rescher writing on neoidealism Josephine Donovan commenting on feminist philosophy Tyler Burge discussing the philosophy of language and mind and Robert Hanna reflecting on Kant's legacy The second section presents the thought of those who identified themselves with the continental tradition featuring Jean Grondin on hermeneutics Leonard Lawlor on phenomenology Charles Scott on postmodernism and Babette Babich on the philosophy of science This volume also covers logical positivism naturalism pragmatism aesthetics existentialism Marxism the Frankfurt School structuralism psychoanalysis political philosophy ethics and the philosophy of religion The final section addresses concurrent trends in Indian Chinese Japanese and African philosophy and a comprehensive introduction by the editor not only provides a thorough outline of the problems and issues of the analytic and continental traditions but also boldly challenges the conviction that the two approaches must be rivals Columbia Companion to Twentieth Century Philosophies is an invaluable overview of the ideas that have shaped a monumentally important century in the history of philosophy offering an unusually panoramic perspective that allows readers to form their own interpretations of original materials

Ernest Sosa John Greco, 2008-04-15 This is the first book devoted to the work of Ernest Sosa one of the most influential contemporary epistemologists Part of the acclaimed Philosophers and Their Critics series The editor's introduction serves as an introduction to Sosa's epistemology Contains critical essays by more than twenty of the most prominent epistemologists in the world commenting on Sosa's work Concludes with Sosa's own reply to his critics

Cartesian Truth Thomas C. Vinci, 1998 Arguing that science and metaphysics are inseparably linked in Descartes work and that one can't be understood without the other the author offers a reconstruction of central parts of Descartes metaphysics and theory of perception

Faith, Hope, and Love Troy DuJardin, M. David Eckel, 2022-07-22 These essays consider the three traditional theological virtues faith hope and love alongside their opposites doubt despair and hate from a scholarly perspective The volume includes contributions not just from philosophers of religion but also from psychologists sociologists and film and literature scholars to paint a complex and nuanced picture of these virtues both of how we might understand them and how we can hope to embody them ourselves While these virtues make up a core part of the Christian tradition the chapters here go far and wide in search of different cultural conceptions of these universal human concerns Inquiries are made into these virtues within Hindu Buddhist Jewish and Islamic thought alongside philosophers

including Aristotle Hegel Kierkegaard Nietzsche Levinas and Murdoch The resulting tapestry is often beautiful sometimes horrific but always thoroughly human This text appeals to students and researchers working in these fields Chapter 9 is available open access under a Creative Commons Attribution 4.0 International License via link springer.com

Wireless Next Generation Networks Michael G. Harvey, 2014-11-06 This SpringerBrief proposes a trust model motivated by virtue epistemology addressing the need for a more efficient and flexible trust model for wireless next generation networks This theory of trust simplifies the computation and communication overhead of strictly cognitive computational models of trust Both the advantages and the challenges of virtue based trust models are discussed This brief offers new research and a general theory of rationality that enables users to interpret trust and reason as complementary mechanisms that guide our rational conduct at two different epistemic levels The presented model of human social interaction is designed for the highly dynamic and unstructured environment of the mobile Internet and wireless next generation networks

Wireless Next Generation Networks A Virtue Based Trust Model targets network engineers cognitive scientists AI researchers philosophers and social scientists Advanced level students studying computer science electrical engineering and social science will also find the interdisciplinary perspective useful
