Selected Topics in Philosophy is an eclectic mix of various topics in philosophy including the nature of language epistemology ethics the nature of religion and literature metaphysics existentialism and transcendentalism Some particularly interesting issues discussed in the book include George Berkeley and John Locke's theories on the difference between language and reality most confusion and much conflict in the world seems to be because we use words for things that do not exist Immanuel Kant's transcendental idealism and in particular his discussion of antinomies we are not passive tabula rasas on which the external world writes but rather active minds organizing and making sense of a random and incomprehensible world Jean Paul Sartre's existential admonition that we must accept the world with no telos which naturally leads us to the truism that if we wish life to have meaning we must look to ourselves to create it the question of whether there are certain timeless objective standards by which we can judge human actions if we cannot and ethics is subjective how do we distinguish between good and evil what are the limits to our knowledge are there certain immutable truths which we can discover which are built like a pyramid with a broad foundation and each layer resting on the one below or is all knowledge simply how well things cohere like a raft on the open sea floating around with no permanent tether Catalogue of the University of Michigan University of Michigan, 1947 Announcements for the following year included in some vols University of Michigan Official Publication, 1947 General Register University of Michigan, 1946 Announcements for the following year included in some vols *Get Set for Philosophy* Douglas Burnham, 2019-06-01 This is the first book to combine an introduction to Philosophy as a degree subject with the practical study and assessment skills that the student is likely to need It begins by helping a student to make an informed choice about which philosophy course to apply for and goes on to introduce the subject via key problems and philosophers It expertly guides the reader towards philosophical thinking as an activity and offers practical advice for developing techniques specific to the study of philosophy Features Gives brief biographies of major philosophers Provides clear definitions of key terms and guidance on further reading Includes sample essays and examination questions Covers time management and self motivation skills Offers tips on making use of contact time with tutors Catalogue New York University, 1902 The Oxford Handbook of the History of Ethics Roger Crisp, 2013-01-31 This original and comprehensive volume explores the history of philosophical ethics in the western tradition from Homer until the present day Leading experts in the field use their expertise and specialist knowledge to illuminate key subjects and ideas in contemporary ethics and survey the history of the discipline Classification Library of Congress, 1910 **Annual register** University of Chicago, 1898 Courses Catalog - University of Illinois at Urbana-Champaign University of Illinois at Urbana-Champaign, 2002 Includes undergraduate and graduate courses **Catalog of Carleton College for the Academic Year ...** Carleton College (Northfield, Minn.), 1903 *Classification.
