

	 SUSTAINABLE DESIGN	 ECODESIGN	 CIRCULAR DESIGN
Definition	Designing a product in a way that takes the reduction of social, environmental, and economic impacts at the heart. Minimize these impacts as much as possible.	Ecodesign focuses on reducing environmental impact in every step of your product's life cycle. The foundation for Ecodesign is environmental data on a product.	Circular design means designing a product or service that creates no waste and pollution and keeps products and materials in use.
In practise	Look at design choices that reduce social and environmental impacts along every step in the life cycle of your products. From production to the waste phase. Where can you improve?	Environmental data is calculated through Life Cycle Assessments (LCA). The result: 15+ impact categories for each step in a product's life cycle. Analyze which process, material, or component causes your biggest impact- and improve your design.	Analyze and improve your product's design with two specific goals: (1) Minimum (preferably zero) waste & pollution throughout your product's life cycle. (2) Make sure your product's value doesn't decrease at the end of its life.
Examples	<ul style="list-style-type: none"> • <i>Analyze Social impact:</i> Are workers being paid fair wages? Will your product have health-endangering effects on consumers when it's used? • <i>Analyze environmental impact:</i> Which materials in production are impact-intensive? Which processes could be sustainably optimized? 	<ul style="list-style-type: none"> • <i>Product Stewardship:</i> Take full responsibility for your product's entire lifecycle. And make sure the product doesn't get lost at the end of its life- but stays in the value system. • <i>Dematerialization:</i> Reduce the weight, size, and number of materials you use in your design. 	<ul style="list-style-type: none"> • <i>Designing for inner loops:</i> Materials in your product should maintain the highest value during- and after the end of its life. • <i>Moving from products to services:</i> Shifting from ownership to access. Instead of purchasing, you offer your product as a service.
