High Speed CMOS Design Styles Kerry Bernstein, K.M. Carrig, Christopher M. Durham, Patrick R. Hansen, David Hogenmiller, Edward J. Nowak, Norman J. Rohrer, 2012-12-06 *High Speed CMOS Design Styles* is written for the graduate level student or practicing engineer who is primarily interested in circuit design. It is intended to provide practical reference or horse sense to mechanisms typically described with a more academic slant. This book is organized so that it can be used as a textbook or as a reference book. *High Speed CMOS Design Styles* provides a survey of design styles in use in industry specifically in the high speed microprocessor design community. Logic circuit structures I/O and interface clocking and timing schemes are reviewed and described. Characteristics sensitivities and idiosyncrasies of each are highlighted. *High Speed CMOS Design Styles* also pulls together and explains contributors to performance variability that are associated with process applications conditions and design. Rules of thumb and practical references are offered. Each of the general circuit families is then analyzed for its sensitivity and response to this variability. *High Speed CMOS Design Styles* is an excellent source of ideas and a compilation of observations that highlight how different approaches trade off critical parameters in design and process space.

Sourcing Prehistoric Ceramics at Chodistaas Pueblo, Arizona María Nieves Zedeo, 1994 For decades archaeologists have used pottery to reconstruct the lifeways of ancient populations. It has become increasingly evident, however, that to make inferences about prehistoric economic, social, and political activities through the patterning of ceramic variation, it is necessary to determine the location where the vessels were made. Through detailed analysis of manufacturing technology and design styles, as well as the use of modern analytical techniques such as neutron activation analysis, Zedeo here demonstrates a broadly applicable methodology for identifying local and nonlocal ceramics.
