This fourth edition extends the traditional definition of design as covering product design, furniture design, interior design, fashion design, and graphic design to embrace its more recent manifestations which include service design, user interface design, co-design, and sustainable design among others. It also discusses the relationship between design and the new media and the effect of globalisation on design. Taking a broadly chronological approach, Professor Sparke employs historical methods to show how these themes developed through the twentieth century and into the twenty-first century and played a role within modernism, postmodernism, and beyond. Over a hundred illustrations are used throughout to demonstrate the breadth of design and examples among them: design in Modern China, the work of Apple Computers Ltd, and design thinking are used to elaborate key ideas. The new edition remains essential reading for undergraduate and postgraduate students of design studies, cultural studies, and visual arts. *Graphic Design and Architecture, A 20th Century History* Richard Poulin, 2012-11-01 This innovative volume is the first to provide the design student, practitioner, and educator with an invaluable comprehensive reference of visual and narrative material that illustrates and evaluates the unique and important history surrounding graphic design and architecture. *Graphic Design and Architecture: A 20th Century History* closely examines the relationship between typography, image, symbolism, and the built environment by exploring principal themes, major technological developments, important manufacturers, and pioneering designers over the last 100 years.
