Design And Manufacture For Sustainable Development 2004:

Design and Manufacture for Sustainable Development 2004 Tracy Bhamra, Bernard Hon, 2004-10-29 Sustainable development is now becoming a matter that must be addressed at both strategic and operational level whether driven by legislation the greening of the marketplace supply chain requirements or the pressure of events associated with climate change Design and Manufacture for Sustainable Development 2004 is an international volume including papers by distinguished authors for academia and industry These international papers encompass the holistic study and interchange of ideas on the theory practice tools and methodology for the entire product life cycle within the framework of sustainable development

Waste Electrical and Electronic Equipment (WEEE) Handbook Vannessa Goodship, Ab Stevels, Jaco Huisman, 2012-08-30 Electrical and electronic waste is a growing problem as volumes are increasing fast Rapid product innovation and replacement especially in information and communication technologies ICT combined with the migration from analog to digital technologies and to flat screen televisions and monitors has resulted in some electronic products quickly reaching the end of their life The EU directive on waste electrical and electronic equipment WEEE aims to minimise WEEE by putting organizational and financial responsibility on producers and distributors for collection treatment recycling and recovery of WEEE Therefore all stakeholders need to be well informed about their WEEE responsibilities and options While focussing on the EU this book draws lessons for policy and practice from all over the world Part one introduces the reader to legislation and initiatives to manage WEEE Part two discusses technologies for the refurbishment treatment and recycling of waste electronics Part three focuses on electronic products that present particular challenges for recyclers Part four explores sustainable design of electronics and supply chains Part five discusses national and regional WEEE management schemes and part six looks at corporate WEEE management strategies With an authoritative collection of chapters from an international team of authors Waste electrical and electronic equipment WEEE handbook is designed to be used as a reference by policy makers producers and treatment operators in both the developed and developing world Draws lessons for waste electrical and electronic equipment WEEE policy and practice from around the world Discusses legislation and initiatives to manage WEEE including global e waste initiatives EU legislation relating to electronic waste and eco efficiency evaluation of WEEE take back systems Sections cover technologies for refurbishment treatment and recycling of waste sustainable design of electronics and supply chains national and regional waste management schemes and corporate WEEE management strategies

Design and Manufacture for Sustainable Development Bernard Hon, 2002-04-22 Design and Manufacture for Sustainable Development brings together a collection of papers from a conference held at the University of Liverpool in June 2002 that inspire the interchange of ideas on the theory technology tools and methodology for the entire product life cycle within the framework of sustainable development It also embraces key subjects including strategy design materials manufacturing packaging distribution disposal recycling and auditing TOPICS COVERED INCLUDE Philosophy of

and strategy for sustainable technologies Design principles for sustainable development Sustainable manufacturing technologies Use of recycling bio degradable materials Re use and recycling design and technologies Tools for sustainable product design Measurement and auditing Best practices and case studies Impact of emerging legislation International trends and future development Sustainable development will have a fundamental impact on the engineering community since through design and manufacture we are responsible for the use of energy materials and processes for the complete product life cycle This is an essential volume for the bookshelves of those wanting to be well informed about this evolving technology

Handbook of Sustainability in Additive Manufacturing Subramanian Senthilkannan Muthu, Monica Mahesh Savalani, 2016-03-02 This book highlights the sustainability aspects of additive manufacturing AM in two separate volumes It describes the details of this technology and its implications on the entire product life cycle sustainability as well as embedded carbon and the further research needed to move this technology towards sustainable mainstream production Sustainability is not new for any area of industry including additive manufacturing and there are currently a number of ongoing research projects both in industry and in academic institutions that are investigating sustainability embedded carbon and research activities which would need to be done in the future to move this technology towards sustainable mainstream production
