## 6 GREAT TIPS TO IMPROVE AIR QUALITY

1. **Keep it Clean.** A clean building is a healthier building.
  - Vacuum with a vacuum cleaner equipped with a HEPA filter. Opting for hard-surface flooring instead of wall-to-wall carpeting may also cut down on allergens.
  - Regularly clean items like bedding, drapes and soft furnishings, damp areas and flat surfaces that tend to attract allergens.
  - Clear clutter, because it traps and holds dust that can trigger a reaction.
1. **Keep an eye on live Greenery Indoors.** Indoor plants can be natural air purifiers, but they can also collect and foster the growth of mold and plant mites. So, if indoor allergens are a problem, you'll want to avoid them.
2. **Change Heater Air Filters.** If you have a forced-air heating system, be certain to change the filters regularly to ensure that dust and other airborne irritants get trapped instead of being recirculated throughout the home or office.
3. **Invest in an Air Purifier.** If you're allergic to indoor allergens air purifiers help capture some of the irritants that may trigger your symptoms.
4. **Manage Humidity.** Also consider a dehumidifier in damp areas, such as a basement, to help prevent the growth of mold. Ensure that bathrooms, another potential source of mold, are well ventilated as well and scrub off any visible mold that collects in the shower, on fixtures, or walls.
5. **Improve Ventilation In The Building.** Let the fresh air in. Even in the cold months, open windows from time to time to allow fresh air to move into the building. Also, move potential air contaminants out by using fans (i.e., in the kitchen to remove cooking fumes).
