Designing Against Vandalism:

Designing Against Vandalism Design Council, 1979 Designing against vandalism Jane Sykes, 1979 **Design Against Crime** Caroline L. Davey, Andrew B. Wootton, 2017-02-17

Design Against Crime will aid the design profession to meet the challenges presented by the competing needs and complex systems around crime and security. It proposes that designers should use their creative talents to develop innovative solutions to security problems that contribute to the ongoing fight against crime. The authors first explain the design against crime approach to security and security. They go on to provide practical advice on addressing crime and insecurity within the design process and offer practical examples of design being applied to security and safety. They also examine crime victimisation from a global perspective, highlighting the benefits worldwide of reducing opportunities for crime, including issues of national security such as terrorism and natural disasters. A design-led, human-centred approach provides a way forward that is both aspirational and practical. The book is aimed primarily at design professionals, educators and students interested in safety and security from all design disciplines, including product design, architecture, service design and communication design. The book should also be read by crime prevention experts, planners, local authorities, managers of urban environments and policymakers.

A Case for Protective Design, Nuclear and Otherwise Robert Berne, 1972 **Design Against Crime** Barry Poyner, 1983

The book begins with a survey of crime trends, levels of different kinds of crime, related social issues and the resulting costs, both human and financial, that design can help to reduce. Part 1 continues by weighing up more and less traditional approaches to crime prevention, whether they be police-led, detection, punishment and treatment, planning-led, spatially-led, through Space Syntax principles, for example, or community-led. The authors then explain how the Design Against Crime initiative has developed from security-focused design solutions to more proactive, design-led approaches to crime reduction. Part 2 presents examples of design solutions to crime problems in the form of case studies, explaining the processes used and the resulting benefits. Examples include both products and environments: seating, bus shelters, tamperproof containers, personal safety devices, window blinds, housing and multi-storey car parks, amongst others. In Part 3, Design Against Crime steps back to draw together lessons and guidelines from the case studies and related research, formulating a design process for addressing crime through design. The authors evaluate the different methodologies used in both local and national contexts. The last two chapters define future drivers and suggest ways in which legislation and market-driven approaches are required to cope with future problems, including terrorism and crime related to new technologies.

Design for Inherent Security B. Poyner, W. H. Fawcett, 1995

This report explains the principles of design for inherent security as applied to the design or refurbishment of non-residential buildings.
