Early Childhood Wolff-Michael Roth, Maria Ines Mafra Goulart, Katerina Plakitsi, 2012-10-12 Children's learning and understanding of science during their pre school years has been a neglected topic in the education literature something this volume aims to redress Paradigmatic notions of science education with their focus on biologically governed development and age specific accession to scientific concepts have perpetuated this state of affairs This book offers a very different perspective however It has its roots in the work of cultural historical activity theorists who since Vygotsky have assumed that any higher cognitive function existed in and as a social relation first Accepting this precept removes any lower limit we may deem appropriate on children's cognitive engagement with science related concepts The authors describe and analyze the ways in which children aged from one to five grapple with scientific concepts and also suggest ways in which pre service and in service teachers can be prepared to teach in ways that support children's development in cultural and historical contexts In doing so the book affirms the value of cultural historical activity theory as an appropriate framework for analyzing preschool children's participation in science learning experiences and shows that that the theory provides an appropriate framework for understanding learning as well as for planning and conducting training for pre school teachers

Supporting Science, Design and Technology in the Early Years N/A Siraj-Blatchford, Iain

MacLeod-Brudenell, 1999-08-16 How do young children learn science design and technology How can we support young children and help them to develop scientific design and technology skills This practical and accessible text answers these questions and provides guidance for adults working with young children in a variety of formal and informal settings Concrete advice is given to show how parents carers teachers and other professionals can provide a rich learning environment and support children in this important area of the curriculum The differing needs of both adults and children are recognized and a variety of stimulating activities is illustrated A clear and helpful discussion of a developmental framework enables readers to strengthen their own practice and understanding The book will be of value to all early childhood professionals as well as being of great interest to parents and carers

Handbook of Research on Classroom Diversity and Inclusive

Education Practice Curran, Christina M., Petersen, Amy J., 2017-05-30 As classrooms are becoming more diverse teachers are now faced with the responsibility of creating an inclusive classroom community As such researching classroom pedagogies and practices is an imperative step in curriculum planning The Handbook of Research on Classroom Diversity and Inclusive Education Practice is an authoritative reference source for the latest scholarly research on ways to effectively teach all students and further refine and strengthen school wide inclusive pedagogy methods and policies Featuring extensive coverage on a number of topics such as special education online learning and English language learners this publication is ideally designed for professionals educators and policy makers seeking current research on methods that ensure all students have equal access to curricular content and the chance for growth and success
