Designing Filipino:

Designing Filipino Eric S. Caruncho, 2003 Tradition and contemporary design come together in the work of internationally acclaimed Filipino architect Francisco Manosa His striking designs for residences and institutions incorporate vernacular forms and make extensive use of indigenous materials while stretching the boundaries of contemporary tropical design As a hallmark of his style Manosa has long encouraged Filipinos to design their structures with respect to the natural world His work spans a spectrum of clients ranging from the fabulously wealthy to the very poor From show stopping houses and churches to industrial architecture this book showcases Manosa s rich and varied career **Designing Filipino** The Architecture of Francisco Manosa surveys a remarkable body of work that has set new directions for contemporary Filipino architecture

Design and the Vernacular Paul Memmott, John Ting, Tim O'Rourke, Marcel Vellinga, 2023-11-16 Design and the Vernacular explores the intersection between vernacular architecture local cultures and modernity and globalization focussing on the vast and diverse global region of Australasia and Oceania The relevance and role of vernacular architecture in contemporary urban planning and architectural design are examined in the context of rapid political economic technological social and environmental changes including globalization exchanges of people finance material culture and digital technologies Sixteen chapters by architects designers and theorists including Indigenous writers explore key questions about the agency of vernacular architecture in shaping contemporary building and design practice These questions include How have Indigenous building traditions shaped modern building practices What can the study of vernacular architecture contribute to debates about sustainable development And how has vernacular architecture been used to argue for postcolonial modernisation and nation building and what has been the effect on heritage and conservation Such questions provide valuable case studies and lessons for architecture in other global regions and challenge assumptions about vernacular architecture being anachronistic and static instead demonstrating how it can shape contemporary architecture nation building and cultural identities

Entanglements of Designing Social Innovation in the Asia-Pacific Yoko Akama, Joyce Yee, 2023-11-17 Rooted in the places cultures histories and wisdom of the diverse Asia Pacific region this book gathers heterogeneous practices of designing social innovation that address various social political and environmental challenges In contrast to dominant notions of design from the Global North that evolved through industrialisation and modernist thinking the examples in this book speak to designing that is embodied relational temporal ontological and entangled deeply with ecologies This edited volume shares rich and detailed stories from Aotearoa New Zealand Cambodia Indonesia Japan Malaysia Myanmar the Philippines Samoa Thailand Vanuatu and a continent now called Australia that offer honest and critical reflections from practitioners and scholars on designing social innovation Contributors explore issues of ethics politics and positionality in their work This book highlights the importance of respecting multiple knowledge streams worldviews and practices situated in a place This then supports a plurality of designing social innovation In all this book

offers ways to sharpen focus on entangled pluralities as a central condition for designing It is a contribution of hope and inspiration that are becoming more urgently needed in the volatile uncertainties of this world This book will be of interest to scholars working in social innovation service design social design participatory design design anthropology and Asian studies

This extensive text investigates how architects planners and other related experts responded to the contexts and discourses of development after World War II Development theory did not manifest itself in tracts of economic and political theory alone It manifested itself in every sphere of expression where economic predicaments might be seen to impinge on cultural factors Architecture appears in development discourse as a terrain between culture and economics in that practitioners took on the mantle of modernist expression while also acquiring government contracts and immersing themselves in bureaucratic processes This book considers how for a brief period architects planners structural engineers and various practitioners of the built environment employed themselves in designing all the intimate spheres of life but from a consolidated space of expertise Seen in these terms development was to cite Arturo Escobar an immense design project itself one that requires radical disassembly and rethinking beyond the umbrella terms of global modernism and colonial modernities which risk erasing the sinews of conflict encountered in globalizing and modernizing architecture Encompassing countries as diverse as Israel Ghana Greece Belgium France India Mexico the United States Venezuela the Philippines South Korea Sierra Leone Singapore Turkey Cyprus Iraq Zambia and Canada the set of essays in this book cannot be considered exhaustive nor a field guide in the traditional sense Instead it offers theoretical reflections from the field based on extensive archival research This book sets out to examine the arrays of power resources technologies networking and knowledge that cluster around the term development and the manner in which architects and planners negotiated these thickets in their multiple capacities as knowledge experts as technicians as negotiators and as occasional authorities on settlements space domesticity education health and every other field where arguments for development were made Filipino American Architecture, Design, and
