Designs on Life Robert Lee Hotz, 1992-10 In this provocative and astounding work award winning journalist Robert Lee Hotz takes readers into the clinics and laboratories hearts and minds of leading researchers around the world experimenting with startling innovations including genetic testing of embryos women giving birth past menopause and fraternal twins born years apart

A Sexual Odyssey Kenneth E. Maxwell, 2013-11-11 The Brave New World of Sex We've seen in less than a generation a swift revolution in human sexual behavior attitude and consequences so dramatic that some people are left in a state of stunned dismay and the public at large in aimless confusion Much of the trend if you can call a revolution a trend is fueled by or at least made possible by technological innovations dating back to the middle of the twentieth century The birth control pill opened the gate to promiscuity with little fear of pregnancy marriage became an annoyance divorce became an opportunity two working parents became a necessity and teenage sex became nearly as socially acceptable as holding hands or going to the movies The copulation explosion resulted in a spiraling epidemic of children giving birth to children many of them on welfare Girls seeking relief through abortions were sometimes forced to have their unwanted offspring despite the inevitability of some of them living in poverty and a desperate dead end environment of squalor and crime Some misguidedly wanted babies and ended up the same way To top it all discipline 2 *A Sexual Odyssey* became a lost art leaving schools and neighborhoods infested with gun toting knife wielding teenage delinquents even in middle class areas who engaged in contests to see who could get the most girls knocked up The chaotic state of fornication mating and birthing may be a throwback to the past

Pandora's Baby Robin Marantz Henig, 2006 On a September morning in 1973 a hospital administrator in New York City learned of a rogue experiment in progress at his institution and ordered the destruction of a test tube containing a frothy mixture of human eggs and sperm Had the experiment been allowed to continue it might have resulted in the first human fetus created through in vitro fertilization A award winning journalist Robin Marantz Henig takes us back to the early days of IVF when the procedure was viewed as crackpot science and its pioneers as outsiders in the medical world Henig lays out the ethical and political battlefield of the 1970s a battlefield that is recreated with each new technology and traces the sea change that has occurred in the public perception of test tube babies That it was the first step down the slippery slope toward genetic engineering designer babies and human clones and a compelling story from the not so distant past which
