Advances in Systems Engineering Henry Selvaraj, Grzegorz Chmaj, Dawid Zydek, 2023-08-03 This book presents the proceedings of the 30th International Conference on Systems Engineering held at the University of Nevada Las Vegas UNLV USA during August 22-24, 2023. Research in the discipline of Systems Engineering is an important concept in the advancement of engineering and information sciences. Systems Engineering attempts to integrate many of the traditional engineering disciplines to solve large complex functioning engineering systems dependent on components from all the disciplines. The research papers contained in these proceedings reflect the state of the art in systems engineering from all over the world and should serve as vital references to researchers to follow. The topics covered in this book include: AeroSpace Systems, Cyber Physical Systems, Autonomous Systems, Sensor Networks, Machine Learning and Analytics, Internet of Things, Applied Media Informatics and Technology, Control Systems, Energy Systems, Automotive Systems, Biological Systems, Vehicular Networking and Connected Vehicles, Aerospace Systems, Automation, Manufacturing, Smart Grids, Nonlinear Systems, Power Systems, Robotics, Social Systems, Economic Systems, and others. This book is a very good resource for graduate students, researchers, and scholars who want to learn about the most recent development in the fields.

Advances in Selected Artificial Intelligence Areas Maria Virvou, George A. Tsihrintzis, Lakhmi C. Jain, 2022-02-27 As new technological challenges are perpetually arising, Artificial Intelligence research interests are focusing on the incorporation of improvement abilities into machines in an effort to make them more efficient and more useful. Recent reports indicate that the demand for scientists with Artificial Intelligence skills significantly exceeds the market availability and that this shortage will intensify further in the years to come. A potential solution includes attracting more women into the field as women currently make up only 26 percent of Artificial Intelligence positions in the workforce. The present book serves a dual purpose. On one hand, it sheds light on the very significant research led by women in areas of Artificial Intelligence in hopes of inspiring other women to follow studies in the area and get involved in related research. On the other hand, it highlights the state of the art and current research in selected Artificial Intelligence areas and applications. The book consists of an editorial note and an additional thirteen (13) chapters, all authored by invited women researchers who work on various Artificial Intelligence areas and stand out for their significant research contributions. In more detail, the chapters in the book are organized into three parts: namely i) Advances in Artificial Intelligence Paradigms, ii) Advances in Artificial Intelligence Applications, and iii) Recent Trends in Artificial Intelligence Areas and Applications. This research book is directed towards professors, researchers, scientists, engineers, and students in Artificial Intelligence related disciplines. It is also directed towards readers who come from other disciplines and are interested in becoming versed in some of the most recent Artificial Intelligence based technologies. An extensive list of bibliographic references at the end of each chapter guides the readers to probe further into the Artificial Intelligence areas of interest to them.
