Architecture and an International Sensibility Naina Gupta, 2025-05-30 Modern Architecture and an International Sensibility A Curious Cross Atlantic Constellation presents an alternative history of internationalism and modernism with a focus on the role of architecture and spatial practices Beginning at the tail end of the peace movements the turn of the twentieth century and ending with the Nuremberg trials the book highlights the part played by individual agency social reform and architecture in moulding a working everyday definition of what it meant to be international during this time By viewing internationalism through the lens of the individual and the body both as initiator and subject it is repositioned as an integral part of everyday life rather than simply understood to be concerned with geopolitical relations between nations and their institutions The book furthers a research methodology that is multidisciplinary and transnational It will therefore be of interest to researchers and students of architecture and international history **Home Remodeling Projects** ,1995
