even anachronistic they are still a force however unconsciously in the workplaces of the 21st century world *Breaking Things at Work* is an innovative rethinking of labor and machines leaping from textile mills to algorithms from existentially threatened knife cutters of rural Germany to surveillance evading truckers driving across the continental United States Mueller argues that the future stability and empowerment of working class movements will depend on subverting these technologies and preventing their spread wherever possible The task is high but the seeds of this resistance are already present in the Neo Luddite efforts of hackers pirates and dark web users who are challenging surveillance and control often through older systems of communication technology
