startups through resourcefulness and financial prudence bypassing traditional venture capital. It champions operational efficiency and customer centric growth as core strategies for maximizing internal resources. The book highlights that contrary to popular belief self funding can lead to long term stability and independence even in fluctuating economic landscapes. The book argues that bootstrapping isn't just a backup plan but a deliberate strategy fostering innovation and sustainable growth. It debunks myths around needing external funds instead emphasizing creativity and a deep understanding of customer needs. Presenting actionable advice grounded in real world experiences, the book guides readers through the bootstrapping journey covering expense minimization, revenue maximization and operational optimization. The book progresses from introducing core bootstrapping principles to delving into specific strategies and concluding with case studies of successful bootstrapped companies. It provides practical advice on negotiating with suppliers and leveraging low cost marketing equipping entrepreneurs with the tools to build profitable and independent businesses. **Big Data**

**Analytics in Smart Manufacturing** P Suresh, T Poongodi, B Balamurugan, Meenakshi Sharma, 2022-12-14. The significant objective of this edited book is to bridge the gap between smart manufacturing and big data by exploring the challenges and limitations. Companies employ big data technology in the manufacturing field to acquire data about the products. Manufacturing companies could gain a deep business insight by tracking customer details, monitoring fuel consumption, detecting product defects and supply chain management. Moreover, the convergence of smart manufacturing and big data analytics currently suffers due to data privacy concern, short of qualified personnel, inadequate investment, long term storage, management of high quality data. The technological advancement makes the data storage more accessible, cheaper and the convergence of these technologies seems to be more promising in the recent era. This book identified the innovative challenges in the industrial domains by integrating heterogeneous data sources such as structured data, semi structures data, geo spatial data, textual information, multimedia data, social networking data etc. It promotes data driven business modelling processes by adopting big data technologies in the manufacturing industry. Big data analytics is emerging as a promising discipline in the manufacturing industry to build the rigid industrial data platforms. Moreover, big data facilitates process automation in the complete lifecycle of product design and tracking. This book is an essential guide and reference since it synthesizes interdisciplinary theoretical concepts, definitions and models involved in smart manufacturing domain. It also provides real world scenarios and applications making it accessible to a wider interdisciplinary audience. **Features** The readers will get an overview about the smart manufacturing system which enables optimized manufacturing processes and benefits the users by increasing overall profit. The researchers will get insight about how the big data technology leverages in finding new associations, factors and patterns through data stream observations in real time smart manufacturing systems. The industrialist can get an overview about the detection of defects in design, rapid response to market innovative products to meet the customer requirement which can benefit their per capita income in better way. Discusses technical viewpoints.
