Computing Technologies and Applications Latesh Malik, Sandhya Arora, Urmila Shrawankar, Maya Ingle, Indu Bhagat, 2021-11-09 Making use of digital technology for social care is a major responsibility of the computing domain. Social care services require attention for ease in social systems, e-farming and automation etc. Thus the book focuses on suggesting software solutions for supporting social issues such as health care, learning about and monitoring for disabilities and providing technical solutions for better living. Technology is enabling people to have access to advances so that they can have better health. To undergo the digital transformation, the current processes need to be completely re-engineered to make use of technologies like the Internet of Things, IoT, big data, analytics, artificial intelligence and others. Furthermore, it is also important to consider digital initiatives in tandem with their cloud strategy instead of treating them in isolation. At present, the world is going through another possibly even stronger revolution: the use of recent computing models to perform complex cognitive tasks to solve social problems in ways that were previously either highly complicated or extremely resource intensive. This book not only focuses on the computing technologies, basic theories, challenges and implementation but also covers case studies. It focuses on core theories, architectures and technologies necessary to develop and understand the computing models and their applications. The book also has a high potential to be used as a recommended textbook for research scholars and postgraduate programs. The book deals with a problem-solving approach using recent tools and technology for problems in health care, social care etc. Interdisciplinary studies are emerging as both necessary and practical in universities. This book helps to improve computational thinking to understand and change the world. It will be a link between computing and a variety of other fields. Case studies on social aspects of modern societies and smart cities add to the contents of the book to enhance book adoption potential. This book will be useful to undergraduates, postgraduates, researchers and industry professionals. Every chapter covers one possible solution in detail along with results. **AI in Language Teaching, Learning, and Assessment** Pan, Fang, 2024-02-12 The introduction of Artificial Intelligence (AI) has ignited a fervent academic discourse. AI's role is as both a powerful ally and a potential adversary in education. For instance, ChatGPT is a generative AI which mimics human conversation with impressive precision. Its capabilities span the educational spectrum from answering questions and generating essays to composing music and coding. Yet, as with any innovation, its advent has sparked a spirited academic dialogue. **AI in Language Teaching, Learning, and Assessment** seeks to address these concerns with rigor and thoughtfulness. It explores the undeniable drawbacks of AI in language education and offers strategic insights into their prevention. It scrutinizes the resources and safeguards required to ensure the ethical and secure integration of AI in academic settings. This book lays out the multifaceted benefits of incorporating AI into language teaching, learning and assessment. Its chapters dissect the transformative impact of AI on pedagogy, teaching materials, assessment methodologies, applied linguistics and the broader landscape of language education development. This book is a valuable

resource for language learners educators researchers and scholars alike It beckons to those who are keen on exploring and implementing AI in education as well as AI developers and experts seeking to bridge the chasm between technology and language education
