Baron,2026-01-20 What happens to human reading when AI bots can do it for us

Explosive developments in artificial intelligence have awed everyday users with the technology's ability to draw code, computer coding and especially to write. Those AI-generated essays and poems, legal briefs and responses to requests for information are all visible evidence of large language models at work. What we don't see is the critical prior step before it can write: AI needs to read. While AI's written outcomes are remarkably similar to what a diligent student, lawyer or researcher might produce, AI doesn't read the way that humans do. Now that AI is proving an adept reader, what happens to our own reading skills and motivations, especially at a time when both voluntary and school reading are increasingly on the decline? We have learned that when we let chatbots write for us, there are pros and cons to handing over our virtual pens. It's critical that we also think through the consequences of relinquishing reading, a deeply human activity, to bots. What do we stand to gain and lose when we let AI read for us? Tracing the intersecting trajectories of AI and reading, *Reader Bot* tackles this vital question, revealing why we must be thoughtful about how we welcome AI as reader into our lives. *Teaching with AI* José Antonio Bowen, C. Edward Watson, 2025-12-02. Now completely revised. An essential guide on how AI is revolutionizing the future of learning and how educators can adapt to this new era of human thinking. Artificial Intelligence AI is revolutionizing the way we learn, work and think. Its integration into classrooms and workplaces is already underway, transforming ideas about creativity, authorship and education. In this practical guide, teachers will discover how to harness and manage AI as a powerful teaching tool. Jos Antonio Bowen and C Edward Watson present emerging and powerful research on the seismic changes AI is already creating in schools and the workplace, providing invaluable insights into what AI can accomplish in the classroom and beyond. This second edition provides essential updates to new classes of tools such as reasoning models, deep research and agents, as well as many new assignment ideas and revised prompt ideas throughout. The authors expand the section on simulations and role playing and include a brand new section on customized bots. A new chapter on ethics and environmental concerns rounds out the collection. By learning how to use new AI tools and resources, educators will gain the confidence to navigate the challenges and seize the opportunities presented by AI. From interactive learning techniques to advanced assignment and assessment strategies, this comprehensive guide offers practical suggestions for integrating AI effectively into teaching and learning environments. Bowen and Watson tackle crucial questions related to academic integrity, cheating and other emerging issues. In the age of AI, critical thinking skills, information literacy and a liberal arts education are more important than ever. As AI continues to reshape the nature of work and human thinking, educators can equip students with the skills they need to thrive in a rapidly evolving world. This indispensable guide is a companion text to Joan Monahan Watson's book for K-12 instructors, *Learning with AI*, which leads educators through the uncharted territory of AI-powered education and the future of teaching and learning. **Digital Business and Electronic Commerce** Bernd W. Wirtz, 2024-06-04. This textbook introduces readers to digital business from a management standpoint.
