The Parent-School Board Feuds Gerard Giordano, 2024-10-02 During the COVID-19 pandemic, parents were able to observe their children in online classes. They were surprised by classroom discussions and assignments related to gender, race, ethnicity, and religion, along with the policies that were guiding curricula, tests, technology, athletics, discipline, safety, transportation, funding, and numerous other aspects of schools. Parents began giving their advice to their school boards, but when they were ignored, they disrupted meetings, wrote editorials, created blogs, staged rallies, and lobbied state officials. They were hoping to attract media attention and acquire political power, and were stunned by their success. *The Parent School Board Feuds: Essential Steps by Parents to Improve Schools* recounts parent-school board feuding about controversial classroom topics such as gender and race, their disagreements about school policies including those affecting tests, technology, athletics, and discipline, and the impact that parents had during the pandemic and continue to have today.

AI in Social Studies Education Christopher H. Clark, Cathryn van Kessel, 2025 The introduction of widely available generative AI tools has caused a frenzy of both positive and negative reactions. Between utopian visions and apocalyptic predictions of AI's impact on education, there is a need to thoughtfully consider what education in the age of AI can and should look like. This volume focuses on the implications of AI technology for teachers in K-12 and university settings, providing a careful look at its affordances and drawbacks for social studies curriculum and teaching. Scholars specializing in the field of social studies education provide information and practical ideas for teaching with current technology alongside frameworks for thinking about future iterations of AI. This book fills a critical need, especially among educators, to consider the current and potential future impacts of AI while avoiding the traps of alarmism or techno-utopianism. Whether skeptical or enthusiastic about AI, every social studies educator will find something useful to their practice in this book.
