Behold the Leviathan Saurabh Mukherjea, 2024-10-15 In defiance of the stereotypes trotted out by yesterday s pundits modern India s rise is both unusual and unexpected It is unusual because some of the sharpest economic improvements are being observed in those sections of Indian society which were thought to be the most disadvantaged women oppressed castes and rural India It is unexpected because of the widespread view Until a couple of years ago India s democratic construct was inferior to China s single party state In Behold the Leviathan The Unusual Rise of Modern India Saurabh Mukherjea and Nandita Rajhansa provide a gripping picture of how 1.5 billion Indians are combining to spectacular effect to create a range of social and economic outcomes which have no precedent in any emerging economy For example India now has as many chess grandmasters as the United States and the expertise of its scientists has guided India s space modules to the dark side of the moon a feat no other country has achieved In this zeitgeist defining book the authors have also explored through pathbreaking research why the vast majority of India s companies are struggling to

their team didn't panic. There was an obvious solution: AI-driven technologies. More precisely, an AI-powered robotic process automation (RPA) system. Uber quickly implemented RPA to categorize tickets and handle repetitive and time-consuming customer support tasks. The results? Processing time for common issues dropped from days to minutes. Customer satisfaction skyrocketed with faster response times. Cost savings were massive, with the company's revenue growing from 17 to 32 billion US dollars the following year. Thanks to chatbots, and now AI agents automating customer service is getting easier, cheaper, and more scalable. These digital assistants can answer customer questions and automate simple tasks based on a specific set of data. But only one of them can also make dynamic decisions, plan actions, and even learn from experiences, offering unparalleled service. Curious to know which one is the all-around solution that is more suitable for the B2B ecosystem? This ebook aims to demystify the differences between AI Agents and AI Chatbots, provide their respective benefits, and help businesses make the right choice according to their unique customer service requirements.

**Smart Bots, Happy Customers** Gosia Szaniawska-Schiavo, 2024-08-26 Did you know that AI can automate up to 58% of customer service interactions? Our study on chatbot statistics also confirmed that almost 1.5 million people had at least one conversation with a chatbot within the past year. Well, AI revolutionized how businesses help their clients. It enabled 24/7 support through chatbots, and virtual assistants increased efficiency and allowed human agents to focus on more complex issues. There is just one issue: Not every chatbot is AI. Simultaneously, not all AI-powered solutions will be perfect for all tasks related to customer service, especially in the e-commerce field. Believe us, we would know. At Tidio, we help 300k businesses worldwide automate customer service, collect leads on autopilot, and increase sales. Tidio is one of the most installed chatbot and live chat companies worldwide, specializing in providing tailored customer service solutions. We always strive to be on the cutting edge and respond to our customers' biggest challenges. **Increase sales and lead generation with AI and chatbots** Krzysztof Wroblewski, 2023-07-10 To grow your e-commerce business, you need to gain more clients. And to achieve it, you have to provide high-quality customer experience. Sounds logical. But the more visitors on your website, the more questions your support agents have to handle. And here is the challenge you need to face to successfully grow your store: How to serve more clients, answer more questions, and maintain the high quality of support at the same time? There are two ways. The first is to constantly hire new support agents. It probably will work, but the cost you'll have to take for constantly recruiting and training new employees will be huge. The second way is connected to technology that took the e-commerce industry and not only this one, by a storm and will stay with us for a long time. If not forever, the AI
