**Social Structure Adaptation to COVID-19** Suresh Nanwani, William Loxley, 2024-03-19. Social Structure Adaptation to COVID-19 offers global interdisciplinary perspectives that examine how the COVID-19 pandemic has altered the development trajectory of schools, public health, the workforce, and technology adoption. It explores social themes in society, economy, policy, and culture, and draws on a social framework to describe key functions of societal adaptation to the pandemic. Edited by Suresh Nanwani and William Loxley, the volume is grounded in the study of system components and their objectives to improve overall well-being given the ill effects of the COVID-19 pandemic. Chapters explore interconnected social networks and how sectors restructured themselves to stabilize or transform society. International contributors from 20 countries offer case studies that highlight key themes including personal connectivity, societal equality, well-being, big data, and national resilience. They predict how impactful the pandemic might be in reshaping the future and assess how the COVID-19 pandemic has affected school system shutdown, public health collapse, business closures, public policy failure, and technology-driven social media acceleration. Offering insights into how institutions and sectors work together in times of crisis and how COVID-19 has restructured social behavior, Social Structure Adaptation to COVID-19 will be valuable reading for scholars and students of sociology, political science, anthropology, comparative international development, psychology, and education. It will also be of interest to policymakers concerned with education, work, and organizations, and media and technology.
