How do we balance freedom with the responsibilities we owe each other as members of society Are we free to do whatever we want This idea challenges us throughout our daily lives from how to tackle pandemic restrictions and vaccine mandates to how to respond to technological innovations and climate change warnings In **The Liberty Paradox** David Kinley argues that we must rehabilitate the notion of liberty by rescuing it from the myopic demands of freedom without limit and reinstating the essential ingredient of social responsibility Combining political philosophical and personal reflections as a global human rights lawyer Kinley examines the implications of this liberty reset for how we negotiate freedom s boundaries in the realms of wealth work health happiness security voice love and death With chapters dedicated to each of these life defining domains and written in a style both engaging and insightful **The Liberty Paradox** explores how we try and often fail to balance personal desires and public interests Kinley concludes that preserving liberty and protecting it from radical individualism requires new ways of respecting each other and rebuilding trust in the institutions and people that govern us **The De Gruyter Handbook of Automated Futures** Vaike Fors,Martin Berg,Meike Brodersen,2024-09-23 How does automation affect us our environment and our imaginations What actions should we take in response to automation Beyond grand narratives and technology driven visions of the future what more can automation offer With these questions in mind **The De Gruyter Handbook of Automated Futures** provides a framework for thinking about and implementing automation differently It consolidates automated futures as an inter and transdisciplinary research field embedding the imaginaries interactions and impacts of automation technology within their social historical societal cultural and political contexts Promoting a critical yet constructive and engaging agenda the handbook invites readers to collaborate with rather than resist automation agendas It does so by pushing the agenda for social science humanities and design beyond merely assessing and evaluating existing
