Internet of Production Christian Brecher,Günther Schuh,Wil van der Aalst,Matthias Jarke,Frank T. Piller,Melanie Padberg,2023-12-29 This seminal compendium available through open access illuminates the forefront of digital collaboration in production It introduces the visionary concept of the Internet of Production IoP an ambitious initiative by

Germany's esteemed Cluster of Excellence at RWTH Aachen University. This handbook pioneers the integration of data models and knowledge across development, production, and user cycles, offering interdisciplinary insights into production technology's horizons with the overall objective to create a worldwide lab. The work is organized into seven key parts, each contributing to a comprehensive understanding of the IoP. Part I lays the foundation with interdisciplinary visions and concepts. Part II delves into IoP's infrastructure encompassing digital shadows and actionable artificial intelligence. Part III examines materials within the digitalized production landscape. Part IV confronts the challenges and potentials of production processes under novel digitalization methods. Part V focuses on production management with data-driven decision support, while Part VI explores agile development processes. Finally, Part VII delves into the interplay between internal and external perspectives in the IoP, human-centered work design, and platform-based ecosystems. Supported by the German Research Foundation (DFG), this compendium redefines manufacturing through the transformative IoP lens. Embrace this scholarly endeavor to embrace technological advancement. This is an open access book.

 understand the future of medical applications with generative AI and related applications Generative Artificial Intelligence
 for Biomedical and Smart Health Informatics delivers a comprehensive overview of the most recent generative AI driven
 medical applications based on deep learning and machine learning in which biomedical data is gathered processed and
 analyzed using data augmentation techniques This book covers many applications of generative models for medical image
 data including volumetric medical image segmentation data augmentation MRI reconstruction and modeling of
 spatiotemporal medical data The book explores findings obtained by explainable AI techniques with coverage of various
 techniques rarely reported in literature Throughout feedback and user experiences from physicians and medical staff as well
 as use cases are included to provide important context The book discusses topics including privacy and security challenges in
 AI enabled health informatics biosensor guided AI interventions in personalized medicine regulatory frameworks and
 guidelines for AI based medical devices education and training for building responsible AI solutions in healthcare and
 challenges and opportunities in integrating generative AI with wearable devices Topics covered include Treatment of
