E.M.M.A. Effect Lia Riley,2025-12-02 Jane Austen meets Ali Hazelwood in this steamy friends to lovers STEM rom com He s
 her best friend s little brother and NHL forward She s a computer scientist used to being in control The E M M A her elite AI
 training program claims optimizing his performance requires one thing the perfect match According to its calculations that s
 her Will Harriet discover that The E M M A knows best Harriet Smythe s AI was supposed to create sports legends not
 encourage her crush on her best friend s totally off limits hot younger brother But when funding runs dry she has no choice
 but to enlist Gale Knight as her test subject The same Gale she s been secretly crushing on for years The player who follows
 her every instruction with a knowing smirk that threatens to short circuit her carefully maintained system Everything
 changes when The E M M A determines that finding Gale s perfect match is essential to his peak performance Even worse
 According to its data that match is Harriet Determined to keep things professional Harriet makes it search for new
 candidates But as Gale dutifully endures awkward outings with pop stars and athletes the chemistry between them only
 intensifies And his willing cooperation during their sessions definitely isn t helping her stay focused With her deadline
 approaching and The E M M A still playing cupid Harriet must choose trust in pure logic or admit that sometimes taking
 control means letting go Maybe The E M M A knows something they don t even if they re not ready to compute it yet

Visions of Artificial Intelligence Stefan Raß,2021-03-30 Master s Thesis from the year 2019 in the subject Computer
 Sciences Artificial Intelligence grade 1 University of Vienna language English abstract Artificial Intelligence AI is often
 considered to be one of the defining technologies which will be important in shaping the prosperity and power dynamics of
 the twenty first century In the last five years many governments around the world tried to implement policies that are
 intended to foster AI innovation in order to position themselves as leaders in a space that is thought to be the next global
 paradigm shift Europe and the United States are thought leaders in this field and have published policy documents aimed at
 deliberating the future progress of AI and defining national policies or research strategies which should serve as signposts
 for subsequent decisions Research in Science Technology Society STS studies has shown how sociotechnical imaginaries
 shape the ways emerging technologies are assessed evaluated and regulated in differing political cultures They inform the
 visions that make certain options possible specific outcomes plausible and leave other avenues for policy dormant This thesis
 explores these imaginaries found in policy documents connected to regulatory attitudes towards AI and the social changes

linked to this emerging technology in the United States and Europe along three dimensions First the dominant visions images and ideals associated with the technological innovation in AI Second the expectations of benefits and risks projected onto AI And third the imagined role of governance of AI in the policy documents as well as how society is imagined to be part of the assessment development and regulation The thesis suggests that AI offers a new and rich window into regulatory imaginaries in a specific moment of technological emergence Some of the uncovered attitudes towards AI are reflected in imaginaries connected to previous technologies however AI constitutes a novel moment of emergence that links to unique attitudes to regulating self learning algorithmic intelligence
