After the Pandemic Randy Whitaker, 2022-10-10 Many things define a job seeker experience education first impressions connections passion and the value you might bring to the company you wish to work for For decades the perceived ideal candidate would have all of the above most of the above however a good candidate would have a four year college degree To a great extent an employer still would like someone with a four year college degree However I believe this is changing The need for those who work with their hands and those who are willing to work their way up through the various levels of an organization is becoming more and more desired by companies The time it will take you to earn your degree you could be making a nice living and will have accrued zero debt in the process Plus after working in an industry of your choice something you do have an interest in even a passion for you may be on equal footing with a newly hired college grad based on the four years you have been working in your industry of choice as you continue to work your way up through the company You will find the more value you bring to a company the more they will look to you to assume great responsibility Typically the more responsibility the greater the paycheck What makes this book timely is the fact as COVID 19 winds down we are seeing many labor shortages in many areas and industries Now is the absolute best time to go to an industry experiencing a labor shortage or enter one of the numerous industries researched in this book and get yourself the job you always wanted without the cost and time involved with getting a four year college education I have nothing against getting a degree and there are still many fields where they will always be mandatory however the trades service industries

government railroads law enforcement plus many others will welcome you with open arms without the need for a four year degree I hope this book helps

Moorhouse,2022-11-07 This book equips pre service teachers research postgraduate students teacher educators and language specialists with specific knowledge and skills about the principles research and applications of digital portfolios within the EFL writing contexts While most digital portfolio scholarship focuses on higher education this book targets primary level and secondary level school audiences namely pre service teachers teacher educators and Ministry of Education staff members with a focus on EFL writing The rationale behind this design is that the published literature on digital portfolios tends to be generic and one size fits all there has been scant published scholarship about the development of digital portfolio literacy among teachers and pupils which could enable them to upgrade the teaching and learning of writing in a larger EFL environment This volume fills this gap by illustrating the why what and how aspects of digital portfolios in ten reader friendly chapters Guiding educators to enrich their pedagogical repertoire via the portfolio approach this book emphasises a healthy balance between principles research and practice It is an easy to follow guide to setting up digital portfolio systems and coaching pupils to improve writing ensuring the dissemination of digital portfolios with high fidelity
