Continuing Engineering Education for a Sustainable Future

Patricia Caratozzolo, Angeles Dominguez, Bente Nørgaard, Guillermo M. Chans, 2025-08-06 The World Economic Forum stated in its 2023 Future of Jobs report that 44% of workers skills will change in the next five years Additionally six out of ten workers will require training before 2027 and only half will have adequate training opportunities With this in mind the three most pressing challenges currently facing the Continuing Engineering Education CEE community include 1 The shifting skill requirements dictated by the job market Engineering roles in various sectors are evolving demanding a mix of Knowledge Skills and Abilities KSA that is difficult to predict with certainty In addition the pace of Digital Transformation will highly influence these requirements 2 The climate change mitigation and adaptation Engineers must reskill and adapt to changing sustainability requirements and educational programs must support this transition 3 The underrepresentation of minorities Women racial and ethnic minorities and individuals with disabilities face disparities in opportunities mentorship and inclusion *Practices, Education and Technology in Audiovisual Translation* Alejandro Bolaños García-Escribano, 2024-08-30

This book explores the intersections of education and technology in audiovisual translation unpacking the evolution of AVT ecosystems and looking ahead to future directions for the role of technology in the translation industry and higher education The volume begins by outlining a holistic account of audiovisual translation scholarship which includes work on subtitling and dubbing but which has grown to encompass a wider range of practices in light of new technologies before looking at the current landscape of translator education including greater interest in distance education and AVT centered curriculum design These foundations set the stage for an examination of technological inroads which have permeated AVT practice including the rise of cloud based technologies and their use by major media companies Bola os draws parallels between these developments to demonstrate the ways in which new tools can help the ever evolving needs of both the translation industry and higher education and in turn foster industry academia collaboration and the growth of new technologies through investment at the pedagogical level This book will be of interest to students scholars and practitioners in translation studies particularly those working in audiovisual translation translation technologies and translator training The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license
