A variety of therapeutic interventions can help couples develop the tools for a successful relationship. Yet many practitioners begin seeing couples without extensive training in couples work. To fill this gap in their therapeutic repertoires, noted couple therapist Michele Harway brings together other well-known experts in marriage and family therapy to offer the *Handbook of Couples Therapy*, a comprehensive guide to the study and practice of couple therapy. The book's chapters provide a variety of perspectives along developmental, theoretical, and situational lines. Recognizing the need for clinically proven, evidence-based approaches, chapters provide detailed coverage of the most effective treatment modes. Couples at different stages of the lifecycle feature prominently in the text, as do relevant special issues and treatment approaches for each stage. Subjects covered include premarital counseling from the PAIRS perspective, an extensive curriculum of interventions for premarital couples, the first years of marital commitment, couples with young children, couples with adolescents, therapy with older couples, same-sex couples. A variety of theoretical approaches including Cognitive Behavioral, Object Relational, Narrative, Integrative, and Feminist, and Contextual. Special issues and situations including serious illness, physical aggression, addiction, infidelity, and religious/spiritual commitments or conflicts. Providing a diverse set of treatment approaches suited to working with a wide range of adult populations, the *Handbook of Couples Therapy* is an essential resource for mental health professionals working with couples.

*Marriage and Family Therapy* Linda Metcalf, 2011-06-23. There are many different models of marriage and family therapy; the challenge for students and beginning practitioners is deciding which one best suits their individual purposes. This highly practical volume elucidates the defining characteristics of 14 contemporary models, including their history, views of change, views of family, and the role of the therapist, and methods of assessing family dynamics, goal setting, facilitating change, and knowing when to terminate. Each chapter also includes a template for implementing therapy models and realistic case studies, many drawn from actual practice, to illustrate how each model would address common issues. In addition, the volume includes extensive interviews with master therapists such as Albert Ellis, Insoo Kim Berg, Sue Johnson, Susan McDaniel, Gerald Wing Sue, and many others. They share their ideas of the ways in which change occurs, how they set goals, and how they perform therapy. For further clarification, each therapist illustrates how he/she would proceed via the same case study. Learning how to perform effective family therapy can be an arduous process of trial and error; yet this resource will ease the way for students and currently practicing family therapists who need to revisit the basics.
