Dysteleology Michael Berhow, 2019-06-25 A common theological critique of intelligent design ID centers on the problem of dysteleology This problem states that because there are clear examples of suboptimal design in biology life is probably not the product of an engineer like designer If it were then one could argue that the designer is less than fully competent ID critic Francisco Ayala expresses this critique in the following question If functional design manifests an Intelligent Designer why should not deficiencies indicate that the Designer is less than omniscient or less than omnipotent This book provides a philosophical analysis of two approaches to answering this question one offered by Ayala and the other offered by William Dembski a leading ID theorist

Intelligent Design as Proof of Creation Uditha Jayatunga, 2023-10-13 Intelligent Design goes well beyond the evolution debate This book explores the science of this vast

subject from the universe to life as well as going down to cells and DNA It argues that the origin of first life complexities of a cell unparallel information system in DNA and many perfect systems seen in all life can only come from intelligence It also draws evidence from lesser explored topics such as the brain the most complex in the universe power of the zygote superior animal features phylogenetics microbiome development of sexes in new species physiology and fine tuning of over 200 parameters in the universe solar system the earth as well as in the environment needed for life It dissects fallacies and the limitations of Darwinism falling well short of the biological complexities of all life While agreeing with micro evolution which is a drop of water in the ocean of macroevolution It concludes the impossible task of producing 8 7 million species with just two mechanisms of Darwinian theory namely random mutations and natural selection Evidenced by purpose and fine tuning at every level of complexity this book gives proof of Intelligent Design based on undisputable mathematical probabilities

Darwinism Defeated? Phillip E. Johnson, Denis Oswald Lamoureux, Michael J. Behe, 1999 *An Informed Cosmos* Peter S. Williams, 2023-07-14 After a substantial author's preface recounting the author's life journey with the question of science and design in nature *An Informed Cosmos* pulls together essays that jointly cover the core arguments for a scientific theory of intelligent design Along with a foreword by philosopher of science and leading design theorist Stephen C Meyer and a wide range of recommended resources *An Informed Cosmos* offers an informed overview of the contemporary case for intelligent design **God's an Artist and You're a Masterpiece** Lorraine Peterson, 2004 The best selling author of *If God Loves Me Why Can't I Get My Locker Open* uses believe it or not facts of science and the life experiences of teens to paint the portrait of God's love forgiveness and purpose in our lives *Ultimate Reality and Meaning*, 1999
