## **Creating The European Community:**

**European Community** John Pinder, 1995 Invaluable for all those who seek a greater understanding of the European Community John Pinder's book gives a complete and coherent view of its formation He includes recent developments such as the GATT negotiations the Delors II package the aftermath of Maastricht and the new bids for membership and offers his own neo federalist approach to the uncertain future of the Union Creating the European Community Robert Case Mowat, 1973

**Creating European Citizens** Willem Maas, 2007-02 Exploring a key aspect of European integration this clear and thoughtful book considers the remarkable experiment with common rights and citizenship in the EU Explaining this innovation why states cede their sovereignty and eradicate or redefine the boundaries of the politic The European Community Johan Galtung, 2021-05-30 This book first published in 1973 analyses the European Community in a global perspective It asks and answers two main questions what does the European Community mean to the masses of the world and what does it mean to the world community in general Most critical studies of the EC were made from an internal point of view and this book is rare in having an external perspective The author discussed the EC with diverse audiences in 16 countries and his analyses are invaluable in putting the European project in an international context Building European Union Trevor C. Salmon, William Nicoll, 1997 In Building European Union Trevor Salmon and William Nicoll draw upon twenty years experience one as an academic the other as a practitioner of European policy to bring together over 100 key documents on European integration in one volume each document or group of documents is preceded by commentary which locates the document in its historical context and explains its provenance purpose and impact upon the development of European Union *Making History* Sophie Meunier, Kathleen R. McNamara, 2007 The contributors to this volume all leading specialists in the field of EU studies examine the trajectory of the EU and draw on the theoretical tools of historical institutionalism to assess the central political challenges facing the EU *Policy-making in the European Union* Laura Cram, 1997 This book takes a fresh view at attempts to conceptualize the process of European integration It highlights the often neglected but crucial role of European institutions in understanding major constitutional decisions in the European Union **Policy-Making in the European Union** Helen S. Wallace, Mark A. Pollack, Alasdair R. Young, 2025 The ninth edition of Policy Making in the European Union offers students and scholars a comprehensive understanding of the processes and institutions involved in EU policy making It particularly examines these processes in a more politicized context Gives students a solid grounding in theories and empirics of EU policy making Details the processes and institutions central to EU policy making Analyses a wide range of policy areas in greater detail than any competing text considering substantive material in both a practical and theoretical context Concludes with a clear assessment of the challenges that have shaped and will continue to shape policy making including the politicization of the EU Brexit geopolitical shifts and Covid 19 New to this edition Detailed assessment of the implications of greater geopolitical contestation including Russia's invasion of Ukraine

in 2022 Evaluation of the implications of the UK's departure for EU policy making Coverage of the EU's response to the Covid 19 pandemic and what it reveals about EU policy making

**Informal Decision Making in the European Community under the Luxembourg Compromise** Philip Bajon, 2025-10-16 This book analyses the informal decision making process in the EU against the background of a gradually emerging European legal order Based on extensive multi archival research in the UK France Germany the Benelux countries and in Community institutions the book explores the resistance against majority rule under the so called Luxembourg Compromise of 1966 a European soft law that allowed Member States to invoke vital national interests and to veto legislation This gentlemen's agreement was never sanctioned or codified However as a rule of the game it had a significant impact on the operations of the EU for several decades and became an integral part of the EU's consensus approach Its underlying rationale is still alive in the present day EU Presenting a deeply revisionist account of European law and politics the book demonstrates how the Luxembourg arrangement served as a compromise between the Treaty text and political reality as a counterweight to technocratic ideas and as a bridge between irreconcilable divides over European unification It includes case studies from 1965 2000 such as the Eurosclerosis of the 1970s British exceptionalism as an EU member the European revival of the mid 1980s and intergovernmentalism on the verge of negotiating the Maastricht Treaty Highly original in its interdisciplinary comprehensive and archivally rooted method the book interrogates the most important and controversial debates about the past present and future of the European Union

**Building a Bigger Europe** Martin A. Smith, Graham Timmins, 2018-10-24 This title was first published in 2000 A fresh and original study of EU and NATO enlargement which sets both in a comparative context and considers them against a backdrop of the evolution of a pan European security community The book is divided into two parts In part one the authors examine and discuss the EU and NATO enlargement processes and the incremental linkage which has developed between them The major issues and challenges facing the two institutions as they ponder the next steps in enlargement are also assessed Part two includes separate chapters on the post Cold War evolution of the EU and NATO overall These discussions focus on their strengths and limitations in contributing to the broader and more co operative kind of European security which the end of the Cold War makes possible The final chapters examine a number of possible scenarios under which the EU and NATO either succeed or fail in contributing significantly to the development of a new European security order

**NATO, the European Union, and the Atlantic Community** Stanley R. Sloan, 2005-07-28 Provides an interpretive history of the trans atlantic alliance and explores critical developments in US European relations The author considers the ongoing pattern of US unilateralism and its consequences as the trans atlantic and intra European debate over Iraq produced deep splits among the allies and eroded European trust in US leadership

*The History of the European Union* Wolfram Kaiser, Brigitte Leucht, Morten Rasmussen, 2008-09-05 This book radically re conceptualises the origins of the European Union as a trans and supranational polity as it emerged between the Schuman

Plan of May 1950 and the first enlargement of the European Communities at the start of 1973 Drawing upon social science theories and debates as well as recent historical research Wolfram Kaiser and Morten Rasmussen in their introductory chapters discuss innovative ways of narrating the history of the EU as the emergence of a transnational political society and supranational political system Building on these insights eight chapters based on multilateral and multi archival research follow each with case studies of transnational networks public sphere and institutional cultures and policy making which illustrate systematically related aspects of the early history of the EU In the concluding chapter leading political scientist Alex Warleigh Lack demonstrates how greater interdisciplinary cooperation especially between contemporary history and political studies can significantly advance our knowledge of the EU as a complex polity This book will be of interest to students and scholars of Politics European Studies and History **The Making of EU Foreign Policy** Karen E.

Smith,1998-11-11 This book argues that there has been a common European Union EU foreign policy towards six countries of Eastern Europe Bulgaria Czech Republic Hungary Poland Romania Slovakia and analyses why the EU has agreed to the policy The objective of the EU s policy is to support the transformation of Eastern Europe and thus ensure security and stability The most important instrument that the EU has used to reach this objective has been the prospect of enlargement

***Maastricht and Beyond*** Andrew Duff,John Pinder,Roy Pryce,2002-09-11 Maastricht and Beyond is a critical assessment of the European Union brought into being by the Treaty of Maastricht A team of experts provide a clear and thorough appraisal of the main provisions of the Treaty including the three pillared structure of Economic and Monetary Union common foreign and security policy and home affairs and justice showing how these elements will change the function and eventually the character of the European Union The book draws conclusions from the Maastricht process for the next reform of the Union in 1996 and it examines the practicalities of achieving a fully fledged federal democracy making proposals for a constitutional settlement Maastricht and Beyond will appeal to both informed generalists and to students and scholars who want a fresh approach to the stale arguments over Maastricht who seek enlightenment over what the Treaty is for and who have the curiosity to look forward to 1996 and beyond **The European Union** John McCormick,Jonathan Olsen,2013-08-06 A
