## **Creating Modern Capitalism:**

**Creating Modern Capitalism** Thomas K. McCraw, 1997 This is the first book to explain for a broad audience the interconnections among technological innovation management science the power of entrepreneurship and national economic growth in countries like Britain Japan and the United States *Creating Modern Capitalism* Thomas K. McCraw, 1999-11-05 What explains the economic success of the U S Britain Germany and Japan What can be learned from the performances of leading business firms How important were specific innovations by individual entrepreneurs What is the nature of capitalist development McCraw and his coauthors present penetrating answers to these questions *The Ideas That Rule Us* Chris Grocott, 2024-10-07 It may seem surprising that the economic choices we make in society are often determined by ideas rather than scientific evidence or financial resources The consequences of such choices are often stark such as the austerity policies which eroded our ability to withstand crises like the Covid 19 pandemic This book explores the ideas that rule how our economy works how government operates and how workers organise A small number of historical economic ideas remain stubbornly prevalent and powerful today However they are largely based on questionable assumptions about human behaviour and unproven theoretical ideas about economics They were founded within the realms of philosophy and politics rather than hard science This book illustrates how politicians have selectively borrowed convenient economic concepts in order to promote and defend policies which entrench and escalate inequalities and other structural problems This accessible book invites readers to question the ideas that rule us and explore the challenges facing society It invites progressive thought about how we need to urgently organise action for the future *The Jews and Modern Capitalism* Werner Sombart, 1913
