*Creationism and the Conflict over Evolution* Tatha Wiley,2009-01-01 How do our current notions of the workings of the universe fit with our deepest convictions about its meaning and value From religion we grasp the world as created given gift From science we apprehend it as evolving in process changing How do we bring these apprehensions together Or can we Is our impulse to find the two complementary creation and evolution Or is it to find them contradictory creation or evolution The way in which we answer these questions carries personal and intellectual consequences It will constitute the first piece in a worldview within which we order our religious beliefs and scientific judgments from the Preface

**The Battle of Beginnings** Del Ratzsch, 2010-02-28 Voted one of Christianity Today's 1997 Books of the Year Creation versus evolution The debate is growing louder and hotter whether in lecture halls or in between the pages of bestselling books But neither side seems to be winning Why In The Battle of Beginnings Del Ratzsch examines the history of the debate and critiques the entrenched positions that he argues merely impede progress toward the truth Dissatisfied with both creationist fallacies and materialist misconstruals he seeks to lay the groundwork for more fruitful dialogue In considerable detail Ratzsch looks at the history and development of Darwin's theory and common creationist misunderstandings of evolution He then moves on to examine the history and development of creationist theory and pervasive evolutionist misunderstandings of it He also discusses the nature of science and common creationist and evolutionist abuses as a prelude to showing why both sides have remained critical of theistic evolution Above all Ratzsch argues that until philosophical confusion logical missteps and various other snarls have been untangled little real progress can be made in sorting out competing theories of life and its origin With this book he challenges and equips all of us to think more clearly

**The Controversy** Donald E. Chittick, 1984 In this book Donald Chittick demonstrates how the basic opposing assumptions of theism a Creator acted and naturalism a Creator didn't act inevitably lead to different conclusions about the beginning of the universe and man He deals with many of the perplexing questions about the problems of creation evolution Questions like How old is the earth Where do dinosaurs fit into the history of the earth How accurate is radioactive dating Using the biblical assumption that the Creator did indeed act Chittick shows that creation science is a credible alternative to evolutionary theory From publisher's description
