**Books Out-of-print**, 1986 *National Union Catalog*, 1981 Includes entries for maps and atlases *Creation, Contingency and Divine Presence in the Theologies of Thomas F. Torrance and Eberhard Jüngel* Roland Spjuth, 1995 The focus of this study is the doctrine of creation an issue brought into the centre of attention by the modern ecological urgency but also challenged by the postmodern rejection of analogy and meta narration From the stance of this modern debate the author analyses the doctrine of creation in the theologies of Thomas F Torrance and Eberhard Jungel Thus the work becomes both a penetrating examination of a crucial dogmatic issue and the first critical comparison between two main representatives of the theology influenced by Karl Barth *National Union Catalog, 1981*, 1982 □□□□□□□□ □□, 2002 8

*Echoes of Coinherence* W. Ross Hastings, 2017-07-28 This book re imagines the universe and the scientific study of it through the lens of a triune Creator three persons of irreducible identity in a perichoretic or coinherent communion It modestly proposes that Trinitarian theology and especially the coinherent natures of the Son in the incarnation provides the

metaphysic or theory of everything that manifests itself in the subject matter of science The presence of the image of the triune God in humanity and of traces of this God in the non human creation are discussed highlighting ontological resonances between God and creation resonances between the being of God and his creation such as goodness immensity yet particularity intelligibility agency relationality and beauty This Trinitarian reality suggests there should be a similarity also with respect to how we know in theology and science critical realism something reflected in the history of ideas in each These resonances lead to the conclusion that the disciplines of theology and science are in fact coinherent not conflicted This involves recognition of both the mutuality of these vocations and also importantly their particularity Science its own distinct guild yet finds its place ensconced within an encyclopedic theology and subject to first order credal theology

**Perspectives on Science and Christian Faith ,1997      International Environmental Law, Policy, and Ethics**

Alexander Gillespie,2014 This second edition of International Environmental Law Policy and Ethics revises and expands this groundbreaking study into the question of why the environment is protected in the international arena This question is rarely asked because it is assumed that each member of the international community wants to achieve the same ends However in his innovative study of international environmental ethics Alexander Gillespie explodes this myth He shows how nations like individuals create environmental laws and policies which are continually inviting failure as such laws can often be riddled with inconsistencies and be ultimately contradictory in purpose Specifically he seeks a nexus between the reasons why nations protect the environment how these reasons are reflected in law and policy and what complications arise from these choices This book takes account of the numerous developments in international environmental law and policy that have taken place the publication of the first edition most notably at the 2002 World Summit on Sustainable Development and the 2012 Rio 20 United Nations Conference on Sustainable Development Furthermore it addresses recent debates on the economic value of nature and the problems of the illegal trade in species and toxic waste The cultural context has also been considerably advanced in the areas of both intangible and tangible heritage with increasing attention being given to conservation wildlife management and the notion of protected areas The book investigates the ways in which progress has been made regarding humane trapping and killing of animals and how in contrast the Great Apes initiative and similar work with whales have failed Finally the book addresses the fact that while the notion of ecosystem management has been embraced by a number of environmental regimes it has thus far failed as an international philosophy      *Choice* ,1981

Elenchus bibliographicus biblicus of Biblica ,1982      Biodiversity Conservation Ethics in Major Religions H. S. A.

Yahya,2010-10-22 Covering three broader issues biodiversity conservation religious doctrine and environment the book Biodiversity Conservation Ethics in Major Religions is the result of a unique approach It attempts to initiate scientific discourse through the fabric of religions Spread across 15 chapters the book covers the essence of 10 religions on biodiversity encompassing a wide range of issues related to conservation The book promises to be a useful resource for

biodiversity students researchers and protected area managers and also for religious scholars who are invited to look at the broader themes of religions beyond theology      *Contemporary Issues in Science & Christian Faith* American Scientific Affiliation, 1992
