Davenport,Julia Kirby,2016-05-24 An invigorating thought provoking and positive look at the rise of automation that explores how professionals across industries can find sustainable careers in the near future Nearly half of all working Americans could risk losing their jobs because of technology It's not only blue collar jobs at stake Millions of educated knowledge workers writers paralegals assistants medical technicians are threatened by accelerating advances in artificial intelligence The industrial revolution shifted workers from farms to factories In the first era of automation machines relieved humans of manually exhausting work Today Era Two of automation continues to wash across the entire services based economy that has replaced jobs in agriculture and manufacturing Era Three and the rise of AI is dawning Smart computers are demonstrating they are capable of making better decisions than humans Brilliant technologies can now decide learn predict and even comprehend much faster and more accurately than the human brain and their progress is accelerating Where will this leave lawyers nurses teachers and editors In Only Humans Need Apply Thomas Hayes Davenport and Julia Kirby reframe the conversation about automation arguing that the future of increased productivity and business success isn't either human or machine It's both The key is augmentation utilizing technology to help humans work better smarter and faster Instead of viewing these machines as competitive interlopers we can see them as partners and collaborators in creative problem solving as we move into the next era The choice is ours **Machines of Loving Grace** John Markoff,2015-08-25 Robots are poised to transform today's society as completely as the Internet did twenty years ago Pulitzer prize winning New York Times science writer John Markoff argues that we must decide to design ourselves into our future or risk being excluded from it altogether In the past

decade Google introduced us to driverless cars Apple debuted Siri a personal assistant that we keep in our pockets and an Internet of Things connected the smaller tasks of everyday life to the farthest reaches of the Web Robots have become an integral part of society on the battlefield and the road in business education and health care Cheap sensors and powerful computers will ensure that in the coming years these robots will act on their own This new era offers the promise of immensely powerful machines but it also reframes a question first raised more than half a century ago when the intelligent machine was born Will we control these systems or will they control us In *Machines of Loving Grace* John Markoff offers a sweeping history of the complicated and evolving relationship between humans and computers In recent years the pace of technological change has accelerated dramatically posing an ethical quandary If humans delegate decisions to machines who will be responsible for the consequences As Markoff chronicles the history of automation from the birth of the artificial intelligence and intelligence augmentation communities in the 1950s and 1960s to the modern day brain trusts at Google and Apple in Silicon Valley and on to the expanding robotics economy around Boston he traces the different ways developers have addressed this fundamental problem and urges them to carefully consider the consequences of their work We are on the brink of the next stage of the computer revolution Markoff argues and robots will profoundly transform modern life Yet it remains for us to determine whether this new world will be a utopia Moreover it is now incumbent upon the designers of these robots to draw a bright line between what is human and what is machine After nearly forty years covering the tech industry Markoff offers an unmatched perspective on the most drastic technology driven societal shifts since the introduction of the Internet *Machines of Loving Grace* draws on an extensive array of research and interviews to present an eye opening history of one of the most pressing questions of our time and urges us to remember that we still have the opportunity to design ourselves into the future before it's too late
