Artificial Intelligence in Records and Information Management Mutsagondo, Samson, 2025-04-11 As trending and general technology of the day, artificial intelligence (AI) has permeated every facet of life, such as medicine, commerce, health, as well as media. The records management domain is no exception. Records and information management benefit from AI by being relieved of many tedious processes that may be easily subjected to manual oversight. Thus, through AI compliance, security, and efficiency in records management can be greatly enhanced. *Artificial Intelligence in Records and Information Management* outlines and assesses the role and contribution of AI in the records and information management domain. It establishes how records and information management can benefit from the application of artificial intelligence inclusive of all its sub-technologies. Covering topics such as archival software, data governance, and academic scholarship, this book is an excellent resource for records officers, records managers, information professionals, archivists, documentalists, information and communication technology (ICT) professionals, heritage managers, museologists, historians, archaeologists, media professionals, professionals, researchers, scholars, academicians, and more.

Fake-Checking Andrea Hickerson, Christopher Schwartz, Matthew Wright, 2025-12-16 Designed to help journalists keep pace with the rapid evolution of deepfakes, as well as integrate fake-checking methods into their routine reporting practices, this book offers a concise and accessible guide for reporters navigating this evolving challenge. This guide aims to assist journalists in understanding the complexities of deepfakes from a number of angles, including philosophical, historical, technical, and methodological. Rather than approaching deepfakes as a journalistic apocalypse, this book contextualises them in the larger historical practice of fact-checking and, on a continuum of technological advances in image and video manipulation, encourages readers to view fact-checking as a multimodal process. It stresses the importance of combining philosophical and technical tools, especially ones based in epistemology and artificial intelligence (AI), in addition to the pavement-pounding essentials of good journalism. The book concludes with a chapter addressing how to explain deepfakes to a public progressively more concerned about the realities and consequences of AI and misinformation. *Fake Checking* serves as a practical reference for journalists and advanced media students who are increasingly required to identify and verify potential deepfakes and their future iterations.
