Christian Science will run its course as other systems of thought once much in evidence have run theirs and will not be materially influenced by the discussions to which it has given rise. Yet to discuss the subjects of the day is an intellectual need. The process of winnowing out truth from error must go on without interruption the more so in this case as Christian Science skims over many subjects of the very highest importance opening up to controversial minds fair vistas of debatable ground. But why associate New Thought with its traditional foe? The answer must be sought in the treatise itself which makes plain that whatever minor differences there may be between these two organizations their wider aims and common pursuits unite them in a clearly defined group and blend together naturally in a common discussion. Mind healing is not exactly an American invention or monopoly. We shall see that it is practically coeval and coextensive with the human race. Yet in our own days and place it has taken on hues and shapes that differentiate it radically both from its remoter and its nearer ancestors and it is assuming proportions that may yet put its European prototypes completely in the shade. In its American dress it has crossed both the Atlantic and the Pacific and is making a successful bid for world supremacy in its chosen field. Under these circumstances an inquiry into the origin, the underlying principles, and the methods of these movements must prove of interest even if from a religious point of view they are not of sufficient moment to claim attention. Such an investigation is no longer a pioneer work. Many Protestant authors have turned their attention to this newer Protestantism. Not a few scent in this new gospel of health danger for what they are pleased to call orthodox Christianity; their works are polemical in character and of the whole of but little intrinsic worth. Others, not particularly interested in the Churches, have been attracted by the psychological problems which the real or pretended

successes of these mind healers have forced on their consideration These though pursuing strictly scientific methods of investigation but too often mar their work by an ill disguised hostility or a studied indifference to revealed religion so that hardly any work of either class could be unreservedly recommended From the Catholic viewpoint few of the publications that have appeared valuable though they are in their own way can be said to do justice to the subject A fairly complete list of these books pamphlets and articles will be found in the bibliography page 262 Among these we might single out as of greater excellenc Father Lambert s Christian Science before the Bar of Reason Fr Thurston s Christian Science in Lectures on the History of Religions Fr Searle s work entitled The Truth about Christian Science and especially in its scieutific aspect Dr Walsh s various works on psychotherapy The present essay proposes besides briving a short historical survey of mental healing followed by a discussion of the causes that may serve to account for whatever success the movement has achieved to discuss from the Catholic standpoint more fully than has as yet been done its philosophical and religious presuppositions implications and doctrinal statements There yet remains for me to fulfill the pleasant duty of thanking all those who have helped me in the preparation of this essay in any way whatever by counsel correction or revision of the manuscript I desire more particularly to express my sincere thanks to Rev Charles C Aiken D D Dean of the Faculty of Sacred Sciences at the Catholic University of America who suggested this work and who by advice encouragement and kind interest very materially cooperated in its completion

What is the origin of life Hasn t the Catholic Church always been hostile to science Can a Christian accept the scientific theory of evolution How can you as a Catholic explain what the Church teaches about the relationship between science and faith Scientist writer and scholar Stacy Trasancos gives us ways we can talk about how science and our Catholic faith work together to reveal the truth of Christ through the beauty of his creation As a scientist who was led to Catholicism through her work Stacy Trasancos has confronted some of the basic questions we all face In *Particles of Faith* she teaches us how to explain the symbiotic beauty between our curiosity expressed through science and our love of Christ and his Church Trasancos uses her own story as well as encyclicals such as Pope Francis s *Lumen Fidei* the deep reflections of theologians such as St Thomas Aquinas and the exacting work of Catholic scientists like Rev Georges Lema tre who proposed the game changing Big Bang theory to show how science and faith are interwoven and meant to guide us on the path to truth By the time you finish reading *Particles of Faith* you ll be able to answer questions about generate discussion on and explain why science helps deepen your faith
