## **Christian Theological Tradition Reader:**

*The Christian Theological Tradition* Catherine Cory, 2019 The fourth edition of *The Christian Theological Tradition* provides students with essential theological knowledge of key persons and events of the Bible and the Christian faith and of Christianity's multifaceted encounter with Western culture. Historically arranged, the textbook addresses major theological themes such as revelation, God, Jesus Christ, creation, salvation, and the church. The textbook deals with the entire Christian tradition from an orientation that is both Catholic and ecumenical, with the fourth edition including expanded coverage of modern Protestant Christianity. *The Christian Theological Tradition* has been thoroughly revised and updated with nine new or rewritten chapters, including a new section on the reception of the Second Vatican Council, including the pontificate of Pope Francis; a new treatment of contemporary developments in liberation and environmental theology; a new examination of the relationship between science and Christianity; an entirely rewritten treatment of Islam that focuses on the ways in which the Christian tradition has historically understood and responded to Islam; a new discussion of the New Atheism with theological responses to this influential movement. With the assistance of images and maps, key words, and recommended reading, this textbook outlines the methods for Christian theology and demonstrates the relevance of the Christian theological tradition for our contemporary world. This is an ideal resource for students of Theology, Biblical Studies, or Religious Studies, and anyone wanting an accessible and comprehensive introduction to the Christian Theological tradition.

complete overview of the subject      New Narratives for Old Anthony Briggman, Ellen Scully, 2022-06-17 Guilds and conferences have grown up around historical theology yet no volume has ever been dedicated to the definition and illustration of the method undergirding historical theology This volume both defines and illustrates the methodology of historical theology especially as it relates to the study of early Christianity and situates historical theology among other methodological approaches to early Christianity including confessional apologetics constructive theology and socio cultural history Historical theology as a discipline stands in contrast to these other approaches to the study of early Christianity In contrast to systematic or constructive approaches it remains essentially historical with a desire to elucidate the past rather than speak to the present In contrast to socio historical approaches it remains essentially theological with a concern to value and understand the full complexity of the abstract thought world that stands behind the textual tradition of early Christian theology Moreover historical theology is characterized by the methodological presupposition that unless good reason exists to think otherwise the theological accounts of the ancient church articulate the genuine beliefs of their authors The significance of this volume lies in the methodological definition it offers The strength of this volume lies in the fact that its definition of the historical method of studying theology is not the work of a single mind but that of over twenty respected scholars many of whom are leaders in the field The volume begins with an introductory essay that orients readers to various approaches to early Christian literature it moves to two technical essays that define the historical method of studying early Christian theology and then it illustrates the practice of this method with more than twenty essays that cover a period stretching from the first century to the dawn of the seventh      The Christian Theological Tradition Catherine A. **Reading Christian Theology in the Protestant Tradition** Kelly Kapic, Hans Madueme, 2018-01-25 Reading Christian Theology in the Protestant Tradition offers a distinctive approach to the value of classic works through the lens of Protestantism While it is anachronistic to speak of Christian theology prior to the Reformation as Protestant it is wholly appropriate to recognize how certain common Protestant concerns can be discerned in the earliest traditions of Christianity The resonances between the ages became both informative and inspiring for Protestants who looked back to pre reformation sources for confirmation challenge and insight Thus this book begins with the first Christian theologians covering nearly 2000 years of theological writing from the Didache Justin Martyr and Origen to James Cone Jos M guez Bonino and Sallie McFague Five major periods of church history are represented in 12 key works each carefully explained and interpreted by an expert in the field
